

NFT CHAMPIONS

WHITE PAPER

KEY MECHANICS

Play to Earn System

- Win tournament & online PVP matches for cash rewards.
- Beat players in online raid events and get exotic drops.
- Buy & hold land or NFTs to get passive rewards.
- Train & evolve NFTs to increase their resale value.
- Buy and trade rare NFTs.

Advance Battle System

The composition of your team will be a key determining factor in how well players rank in matches. The individual stats of NFTs will determine block rate, base attack strength, skill attack strength, accuracy, speed, MP, Health, Regeneration, Resistance to debuffs, and the success rate of Counters.

In addition to base stats and special attack skills, NFTs also come with unique traits that give them various abilities. (EX: Beast King: Obtains a defense & speed buff when left as the last fighter.) These components are used to provide a key skill gap that will keep gameplay competitive.

Trading System

- To ensure streamline trading, the game will have very low trading fees. The NFT Online Marketplace will be available on both web and mobile devices.
- In-game tokens are required to partake in the marketplace trading process.
- Every NFT sale goes towards holding rewards. Each Champion has a max mint limit that will automatically cause the NFT to become deadstock. After the Champion becomes deadstock, it will only be available for purchase by community online traders via the NFT Marketplace.

GAMEPLAY LOOP

- Buy NFTs from the Online Marketplace or Community Traders
- Level up your NFTs by getting in battles with CPUs or Online Players.
- Go to the training gym and upgrade your team's battle stats.
- Train your NFT to their current max level.
- Visit the DNA Lab and fuse two high-level NFTs to raise their max level. (Fusion reverts the NFT's level back by 10-15)
- Level up your NFT again and evolve it to its next stage. Repeat the process until your fighters reaches their final evolution.
- Use your strongest team of NFTs to compete in raids, online matches, tournaments, and live events
- Sell your rare NFTs to online traders

EARLY ACCESS

Early Access will be released Q1 2022. This version of the game will include a central MMO Hub with Online PVP, In-game NFT Marketplace, Item Shops, Training Gyms, DNA Labs, Ranked Tournaments, and a Battle Park. Content expansions will start Q2 2022.

NFT CHAMPIONS

BECOME A LEGEND

Explore The Overworld

In the Online Campaign, players must travel to seven biome/regions and compete in the city challenge and the city tournament for each region. One of the cities challenges is the Lux City Desert Challenge, where players must traverse a desert sandstorm while fending off wild Champions and other players who are competing for the most points.

In the online campaign, the winner of the final city tournament achieves the rank of League Master.

Online Campaign

- Discover hidden side-quests, as your journey continues, the pool of available quest variations.
- Fight alongside your friends or make new ones, NFT Champions allows cooperative gameplay with players from all around the world.

START YOUR JOURNEY

The game requires an initial investment of at least one NFT Champion, or you can receive a free gift from another player. Once you have a starter team and begin completing tasks and challenges, you can start earning NFTs and Rewards.
