

DEVOLUTION

The title 'DEVOLUTION' is rendered in a bold, white, 3D-style font with a red outline. It is set against a large, grey, cratered moon. Above the moon are three circular icons: a blue water wave, a yellow flame, and a blue swirl. Below the moon is a green circular icon with two leaves. The background is a dark, textured surface with a faint grid pattern.

~~~~~ WHITE PAPER ~~~~~

# DEVOLUTION (\$DEVO)

Devolution is a game that connects players worldwide online.

The game will have a PVE and PVP mode where players can fight against each other with their Evomons.

## HOW TO GET NEW EVOMON'S IN THE TEAM?

The Evomons will be available for free in the game, certain evolution forms can be purchased in the ingame store, with the purchase you automatically get the NFT.

## HOW DO YOU GET NFT'S?

You can get NFT's in the following ways: The Devolution box, Winning at our rewards and raffles, buying or trading. In near future on our own Nft Marketplace!

## THERE ARE 3 TYPES OF EVOMON'S, NORMAL, RARE AND VERY RARE

# THE STORY OF THE EVOMONS

Where we come from and how we came into being is a question that not only occupies mankind.. Let me take you on a journey to the outer moon of the largest planet in our solar system – Jupiter! On the moon "Callisto" life has originated millions of years ago, the so-called Evomon's populate the moon planet. About the origin of the Evomon's there are different myths, some are of the opinion that they were simply there, but the inscriptions of the lost temple city Elara point to a much deeper mystery.. The moon planet Callisto is still a magical unexplored mystery! Start your adventure and explore the moon planet with your curious Flokimon. Callisto is divided into different climate zones, which in turn are home to native Evomon's: In the mountains of eternal ice it's no surprise to meet Evomon's of the element ice and when traveling through the volcanic islands, one must be prepared for fire Evomon's. The oceans of the moon planet are full of undiscovered water Evomon's and the skies are dominated by Evomon's of the element of air. The world of the Evomons, the Jupiter moon Callisto, was once a normal moon as you know it. For reasons that no one knows to this day, a battle took place between the 4 elemental rulers, the legendary evomon's. Through the apocalypse-like battle, Callisto changed into a moon full of elements. Whether the Evomons were created by the 4 elemental rulers, by the fight or were brought there, is unclear until today!

# WHAT ARE NFTS?

Non Fungible Tokens (NFTs) are digital assets that represent objects like art, collectible, and in-game items. They are traded online, often with cryptocurrency, and are generally encoded within smart contracts on a blockchain. Non-fungible tokens (NFTs) are unique digital objects that exist in a variety of contexts and applications. They may represent physical goods through RFID tags on a real object, information such as video information, titles of ownership for virtual items, tradable assets such as cryptocurrency futures contracts; in this way they overlap with both physical property and intellectual property. Gaining popular attention early on with the release of \$DeVo, an online game where people buy and sell cats that continually have different combinations of genes leading to rare or desirable appearances. Many games have been released since then with similar concepts, allowing people to purchase game items as if they were trading card packs. The successful games demonstrate the economic potential that \$DeVo will create for developers who can design their own games using them. The idea behind non-fungible tokens is not entirely new but was coined when DeVo became one of the best-selling apps, showing how individuals might want to collect certain types of tokens rather than just be able to exchange them as fungible tokens do. Games like Devolution provide another value these non-fungible tokens have because it gives people something else to collect outside traditional cards while they still maintain a level of uniqueness among each item being sold within the app's marketplace.

# COMMUNITY GAME

Who doesn't know it: you play a game and you think, if this game would have "this" or "that" possibility it would be awesome more fun! No problem, we are here to develop the BEST game together with you! Together we can do it! Because we think that the community of a project is the most important thing of all, we will start polls every few weeks, where the community can express their wishes. You can share your ideas for new features etc. that you would like to see in the game and we will try to implement the best possible!

# DEVOSTORE

Devolution offers an in-game store, where you can buy items that pushes the attributes of an Evomon. The items can be purchased by paying with \$DeVo tokens. The tokens used for payment are burned.

## DEVONATOR

We offer a Transformer Machine to our players. If you have 2 Evomons and put these 2 Evomons into the Transformer, a new random Evomon will come out. Does it have to be stronger? No! It is a random mechanism. Luck is part of it!

## DEVOLUTION BOX

The Devolution Box offers users a magic swap. What do we mean by magic swap? 2 parties can insert their NFT/ Evomon into the Devolution Box and they will be swapped. Person A does not know what person B has offered. The magic exchange will have requirements: If someone offers a rare Evomon or NFT into the Devolution Box, they can only be swapped with also rare Evomon/ NFT!

## DEVOLUTION RESORT

In the Resort, the evomons you own are at home. this resort offers each evomon , comfortable areas, water, fire earth or wind. Everyone starts with the same resort, players can expand their resort with nft's, or buy, trade or win new resorts. The goal is to bring the resort to the latest level to take advantage of the benefits.

### More functions, more information soon:

- Guild
- Rewards/Challenges
- Level/Power up System
