ABSTRACT

Nearly one century ago, a dog named Antis became a world famous service animal in World War II. When his advanced radar system detected a threat to the digital universe, Antis was revived as a community driven memecoin to make our blockchains safe again! Antis recognizes most memecoins offer zero utility to their loyal holders. Known as the dog of war, Antis will set the standard for memecoins and force his competitors to take care of their holders, or lose them to the Antis Army.

Antis Inu is a community driven memecoin that launched on the BEP-20 network December 28, 2021. Antis Inu is the first memecoin to combine utility, great leadership, and a strong community in one place. Unlike our competitors, Antis Inu will not struggle to find utility and lose the competitive edge once he makes it to the top. Antis Inu will show the world what happens when a memecoin is built on a strong foundation of holders, leaders, and utility alike.

WHAT IS A MEMECOIN?

A memecoin is typically defined as a community driven token launched on the ERC-20 blockchain or BEP-20 blockchain. Various other blockchains exist, but the Ethereum network and the Binance network exist as the most popular. Outside of the technical details, memecoins are presented with a dog logo and a name to match it.

Memecoins have become the most popular form of crypto for users that are new to the space. Doge and Shiba Inu would be the most well-known on this list. The hype that pushes memecoins to marketcaps beyond billions of dollars is the most powerful network effect the world has ever seen. Holders that got in early on projects may find themselves sitting on millions of dollars in a very short time. The issue begins when holders begin to realize hype only drives them to the edge of a cliff. The true problems start when the developers leave it to their holders to bridge themselves to the otherside while leaving the project. Memecoins would serve a much greater purpose if they built tangible utility on their way to the top.

INSPIRATION FOR ANTIS INU

Near the end of World War II, the Shiba Inu species nearly went extinct as a result of bombing raids. Today, Shiba Inu is best known as a token that has grown to become a multi-billion dollar memecoin. Antis Inu is here to steal their spotlight and finish what he started back during World War II. Antis was a world famous dog that joined his master for air raids against enemy targets during World War II. Antis has been revived and now leads these raids on the blockchain and make our digital world safe from incompetent developers.

The true inspiration for Antis Inu is the result of trading worthless memecoins. Why are tokens that offer zero utility making their way to marketcaps well beyond billions of dollars? The better question may be why do their developers attempt to implement utility at the very top? These developers do a poor job in creating a project with tangible value and allow hype to carry their memecoin much further than it should ever be valued. Antis Inu is here to change that forever.

Antis Inu has been given the nickname, "The Shiba Killer". Antis was given this nickname because Shiba will be the first memecoin our army goes to war with. Antis will not allow hype alone to drive the value of our project. Shiba Inu called themselves, "The Doge Killer". Dogecoin is a mineable coin on their very own blockchain. From the very start Antis will prove to be the Shiba Inu Killer. Antis will is using development funds provided from trading volume to purchase commercial Dogecoin miners and create true value for our holders. Ultimately, Antis Inu will funnel the memecoin hype into a tangible long term project with a sustainable ecosystem.

ANTIS INU OBJECTIVES

Antis Inu strives to set a new standard for development and leadership in the world of memecoins while creating tangible value and longevity in a space that is solely reliant on the network effect.

UTILITY

Antis Inu is one of the first memecoins to offer true utility. Using the development tax collected on every transaction, Antis will be purchasing mining rigs and mining Dogecoin or any other coin that the Antis Inu army commands. The coins mined will be rewarded to holders on a first of its kind staking platform. The developers of Antis understand the long-term effects of staking for token rewards. This form of staking only helps the major holders and gives them more tokens to affect the stability of a project. This is why Antis has chosen to purchase mining rigs and offer rewards of the coins being mined. A portion of the coins mined will also be sold and used to promote long term stability in the form of buybacks. Holders will move up in tiers the longer they stake their tokens. The higher the tier, the more miners a holder will have contributing to their rewards. As the Antis Inu community grows, and more miners are put online, the project becomes increasingly backed by true value.

Our developers have formed a special team to create utilities that fuel the exposure of Antis Inu. This team operates under "Antis Studios". Antis studios will launch applications that solve many issues in the crypto space along with games that users can have fun using.

The first application being developed under Antis Studios will prevent scams in the communication channels of crypto. This given application, "Cryptogram", will be an application for crypto projects (tokens, coins), crypto exchanges, crypto applications and crypto experts. Cryptogram will be the safest application to avoid fake groups and scams due to requirements for group creation set by the moderation team. Cryptogram will be the most efficient group to relay information to crypto holders and enthusiasts alike. Additionally, Cryptogram will come with all the tools necessary for tokens and coins to operate without the additional need for bots. Users that want to create a group with Cryptogram will be required to fill out an application. Once the application is approved, their group will be created and they will have admin access. If they want to fast track the application, they will need to pay a fee for the application using Antis tokens. These tokens will be burned in benefit of the community.

The Antis Inu Army will be given a major responsibility in the development of all applications and the expansion of the mining farm. Antis Inu will be launching a custom governance platform for holders to submit proposals and decide on major application features. Along with this, holders will be able to vote on proposals to decide which additional cryptos we should mine.

COMMUNITY

Antis Inu will be community driven under the leadership of his founders. The Antis army will act as the best marketing strategy and grow our community each and every day. The community will offer our project graphics, marketing strategies, web3 developers, and ultimately an ecosystem that will flourish. Without the community, the Antis army will fall. The Antis Inu army will be the first army at war with the two biggest memecoins. Unlike Shiba Inu and Dogecoin, our leaders will stay for every battle we encounter.

SHIBA INU AIRDROP

The Shiba Inu airdrop is a first of its kind marketing tactic intended to offer all Shiba Inu holders a one-way ticket to memecoin utility. We have Airdropped each holder one individual Antis Inu token, thus encouraging them to join our community. Furthermore, this has allowed us to launch with one million holders.

TOKENOMICS

The tokenomics of Antis Inu were created with project longevity in mind. The founders of Antis Inu recognize that their project will grow beyond the limits of Pancakeswap. The founders also recognize the requirements presented by major centralized exchanges. For this reason a deflationary tax protocol was implemented, and the contract ownership will not be renounced until all requirements have been fulfilled.

BASIC INFO

Name	Antis Inu
Antis Inu	Antis
Supply	50,000,000,000
Decimals	9

TAXONOMICS

We are the first Token to have a deflationary tax that is systematically aligned to provide necessary project funding while permitting future exchange listings. With the limited supply of 50 billion tokens, Antis will truly be capable of eating every zero in its path. Antis Inu will have a 10% tax on every buy and sell upon launch. However, our founders recognize this is not a long term solution for project funding and they have created the following deflationary tax system:

- Tax on Launch: 10%
- Tax at 500k Marketcap: 8%
- Tax at 5 Million Marketcap: 6%
- Tax at 50 Million Marketcap: 4%
- Tax at 500 Million Marketcap: 2%
- Tax at 1 Billion Marketcap: 0%

Tax at 500 Million
Marketcap: 2%

Tax at 50 Million
Marketcap: 4%

Tax at 5 Million
Marketcap: 6%

Tax on
Launch: 10%

Tax at 500k
Marketcap: 8%

ROADMAP

The following roadmap items reflect the previous accomplishments of Antis and what is planned for 2022. Additional items will be added to this list as the Antis Inu Army grows and takes command of their project.

QUARTER 4, 2021

- Website V1 Launch
- Pawpaper V1 Launch
- 1+ Million Holders
- Diamond Hand Presale (Verified)
- 4000+ Community Members
- Listing on Pancakeswap (December 28, 2021)
- Coingecko & Coinmarketcap
- Listings International Channels

QUARTER 1, 2022

- Centralized Exchange Listings
- Website V2 Launch
- Pawpaper V2 Launch
- Expand Marketing / Development Teams
- Major Press Releases
- Develop and Launch Antis Inu Web/Mobile Game
- Purchase Initial Set of Miners
- Develop and Launch Antis Staking Platform
- Onboard Major Influencers
- Develop and Launch the Governance Platform
- Antis Inu Merchandise Store Launch
- Initial Development Phase of Cryptogram
- Bridge to Ethereum Network

QUARTERS 2-3, 2022

- Purchase Additional Mining Rigs
- Initiate Development by Governance Voting
- Cryptogram Beta Launch
- Centralized Exchange Listings
- Expand International Channels
- Targeted Marketing Campaigns
- Additional Staking Tiers
- Expand Marketing Teams
- 10,000+ Community Members
- Celebrity Partnerships Expand
- Gaming Development Team
