LEGAL – RISK DISCLOSURE

Cryptocurrencies, tokens and digital assets are extremely volatile and carry high degree of risk. Price movements for cryptocurrencies, tokens and digital assets, are influenced by, among other things: changing supply-demand relationships, sentiment and news releases that often cause large price fluctuations. By using the Services you represent and warrant that:

- You have knowledge and experience in cryptocurrencies, tokens and digital assets.

- You fully understand the risks associated with cryptocurrencies, tokens and digital assets.

Further, you accept that you bear sole liability for all losses resulting from your use of cryptocurrencies, tokens (including the Crypto shield token) and digital assets.

ABOUT US

Crypto Shield is there for those who are dreaming of a passive income with Cryptocurrency. It's possible because of Our Such Massive Events Like LaunchPad, Project Funding, Free Listing Contest, Airdrop/Giveaway Campaign, SHIELD Holder's Rewards, Staking & More Events. On Every Launchpad, Project Funding & Free Listing Contest, In Tax of Some Percentage Of (ABC Project Token) Will Hold By Crypto shield Team. This tax Token is then split between all SHIELD Holder's based on token allocation.

Crypto Shield Token is a deflationary Token created by a team of experts (dev, trader, marketer, economist) and cryptocurrency specialists that aims to literally change the world. It was made to revolutionize the financial system via an eco friendly platform.

The founders of Crypto Shield are highly experienced and have already demonstrated their focus and diligence on another known project. The team will expand as Crypto Shield grows more, adding community managers, marketing leads,developers and moderators.

Everyday Investors are, estimately over $10 - $20 million is lost to malicious/Scams projects.

Crypto Shield Provide Scam Alerts & Shield Protection On Our Website & Social Media To Our Token Holder's & Community to Secure Your Asset Before Investing & Lost On Malicious/Scams Projects. Our Analysing Team Are Expert to analyse Such Like this Projects On Market & Provide a Proofs With Our Community.
CRYPTO SHIELD FUND

As the blockchain and cryptocurrency market continues to experience significant growth, so too does the number of projects coming to the market, with some being legitimate and others being scams.

We at CRYPTO SHIELD have a vision to help fund the growth of only the best upcoming projects and in order to do this we have our own internal selection criteria and process which projects must go through prior to being approved for funding and assistance with an exchange listing.
We have a team of analysts who match the best projects and founders in the crypto ecosystem with token buyers. The selection criteria is challenging and is always being reviewed to ensure we capture the latest trends in the crypto market.

Our team members look for specific indicators of a project's success not only during the initial application, but beyond. These can include but are not limited to;

- Team strength
- Technology strength v/s other competitors
- Token mechanism design
- Marketing, messaging and communication
- Roadmap and timeline

CRYPTO SHIELD LAUNCH

Crypto Shield Launch is a decentralized launchpad zone where project owners will be able to raise funds and liquidity for their projects in accordance with our requirements. It will allow projects to generate initial liquidity in a decentralized manner whilst also allowing the SHIELD community to participate in Initial DEX Offerings for projects that have been vetted and approved by the Crypto Shield team

• Advanced Features

Liquidity: The Crypto Shield Launch system will automatically lock liquidity to any BSC DEX and return the percentage chosen by the project owner. Users holding Crypto SHield tokens will have priority access to launchpad projects on a first-come, first-serve basis.

Security: Crypto Shield Launch will also have advanced functionality to detect and prevent front-running bots from participating in an IDO, combined with a mechanism to lock-up team tokens and mitigate the risk of rugpulls.

Launch Menu: The launch menu is a list of launch strategy options that projects can choose from to conduct their IDO. Ranging from basic fixed price token sales all the way through to dynamic price dutch auctions and more advanced methods such as Initial Bonding Curve Offerings.

• Tiered Launchpad

Crypto Shield Launch utilises a fixed tier system based on a pre-defined number of tokens held by users in their Crypto Shield wallet. The purpose of tiers is to provide opportunities for all community members to participate in launchpad sales, regardless of the size of their holdings. The tiers mean that project tokens will be distributed proportionally to token holders depending on their tier level; the higher the tier, the more tokens will be distributed. Tiers and token requirements are as follows;

- Silver Tier - 10,000 SHIELD
- Gold Tier - 100,000 SHIELD
- Platinum Tier - 500,000 SHIELD
- Diamond Tier - 1,000,000 SHIELD

CRYPTO SHIELD LAUNCH

• VIP Launchpad Section

Our VIP Launchpad section is in addition to our Launchpad Tiers. In order for users to be able to qualify for VIP Launchpad sales, they must;

a) Be a liquidity provider on SHIELDEX

b) Hold the required number of tokens from the highest Launchpad Tier (Diamond)

c) Have been holding Crypto Shield tokens for a consistent 3-month period prior to the launchpad project's launch date

d) Meet a number of participation and usage criteria across all of the Crypto Shield ecosystem products

e) Have participated in at least one previous launchpad

• Launchpad Listing Process

While any project can add liquidity to Crypto Shield swap platform, the process for utilising the Launchpad is more structured and involves a four-stage process:

1. Proposal
2. Crypto Shield Team Approval
3. Community Vote
4. IDO

• Process Overview :

The following process the various stage gates that projects must pass through before being able to conduct an IDO, projects must compete with other projects for the chance to be able to conduct an IDO on the platform:

• Step 1 - Proposal

In the first step, a project fills in a proposal submission form on the Future Protocol Portal which will go through to the Crypto Shield team for review. The criteria for this form is listed out in the section below.

• Step 2 - Crypto Shield Team Approval

After submitting the proposal request, the Crypto Shield Team with the help of market research analysts will conduct a thorough review of the proposed project and determine whether the project meets Crypto Shield Ecosystem listing requirements. If the project is rejected, the project team will be informed via e-mail with some feedback around why their application was unsuccessful.

If the proposal is approved, the Crypto Shield Team will communicate to the community of the upcoming IDO platform vote via an announcement on the Crypto Shield Telegram Announcement channel listing out the following details;

- Project details (site, whitepaper, socials)
- Token metrics & allocation
- Proposed IDO metrics
- Voting observation period and voting date
- Criteria for qualifying to vote
- $SHIELD rewards for participating in voting round

The Crypto Shield Team will then commence the voting observation period and conduct the vote on the voting date.

• Step 3 - Community Approval

For a proposal to be accepted, at least 50% of the community must vote "Yes", if less than 50% of the community vote "Yes" then the project will be notified formally via email that they have been unsuccessful. Once voting has concluded the Crypto Shield Team will distribute $SHIELD token rewards to the participating community members who voted and proceed to prepare the project for the Launchpad IDO.

• Step 4 - IDO Launchpad

The Crypto Shield Team will conduct the IDO in line with the standard tiered launchpad process outlined at the beginning Crypto Shield Lauch Page.

TOKENOMICS

Name : Crypto Shield

Symbol : SHIELD

Decimal : 18

Token Network : BEP20/ERC20

Max Supply : 10 Billion

**Lock Supply : 9 Billion**

Unlock Supply : 1 Billion

Circulating Supply : 250,000,000

Contract BEP20/ERC20 :

Bar chart — Unlock Token Overview:
- Presale: 40%
- Staking Reserved: 30%
- liquidity Lock: 25%
- Team & Bounty: 5%

TOKEN FEATURES & UTILITY

• Governance & Voting :

The community governance tool is a decentralized product based on the SHIELD smart contract. The tool enables each SHIELD holder to exercise their voting rights and participate in the SHIELD community development and growth decision-making process.
Voting Rights

Every SHIELD token holder can exercise their right to vote. Every 1 SHIELD is equal to 1 vote. Community members should fully understand the operating mechanism of the SHIELD community, Council, proposals, rules, etc. and actively participate in the decentralized governance process of SHIELD. Voting is crucial to the development of SHIELD , so please vote often and responsibly.

Council

The SHIELD Community Council is a member organization composed of SHIELD holders who together execute the Foundation Management Regulations on behalf of the SHIELD Foundation, and SHIELD global community. The Council is managed by a Board of Directors which represents the interests of the global community and promotes community advancement and growth throughout the world.

Voting

Any SHIELD holder can create a proposal and participate in the SHIELD voting process. Proposals are reviewed by the Board of Directors on the Community Council, and then opened for public voting. Proposals can apply for Startup funding, Launchpad, issue technology and development changes, add contributor roles.

TOKEN FEATURES & UTILITY

• Fees & Discounts :

Users can use the $SHIELD tokens to pay for discounted transaction fees on wallet, Use to buy products on Crypto Shield Store and receive rewards by holding & participating in the Crypto Shield Daily/Weekly Events & Project Airdrop Campains.

Crypto Shield plans to reward liquidity providers in SHIELD tokens every week, relative to the percentage of the pool they have provided liquidity to. Note that the rewards will appear for 24 hours so users can claim their rewards. However, if users fail to collect their rewards within 24 hours, their rewards will be redistributed later.
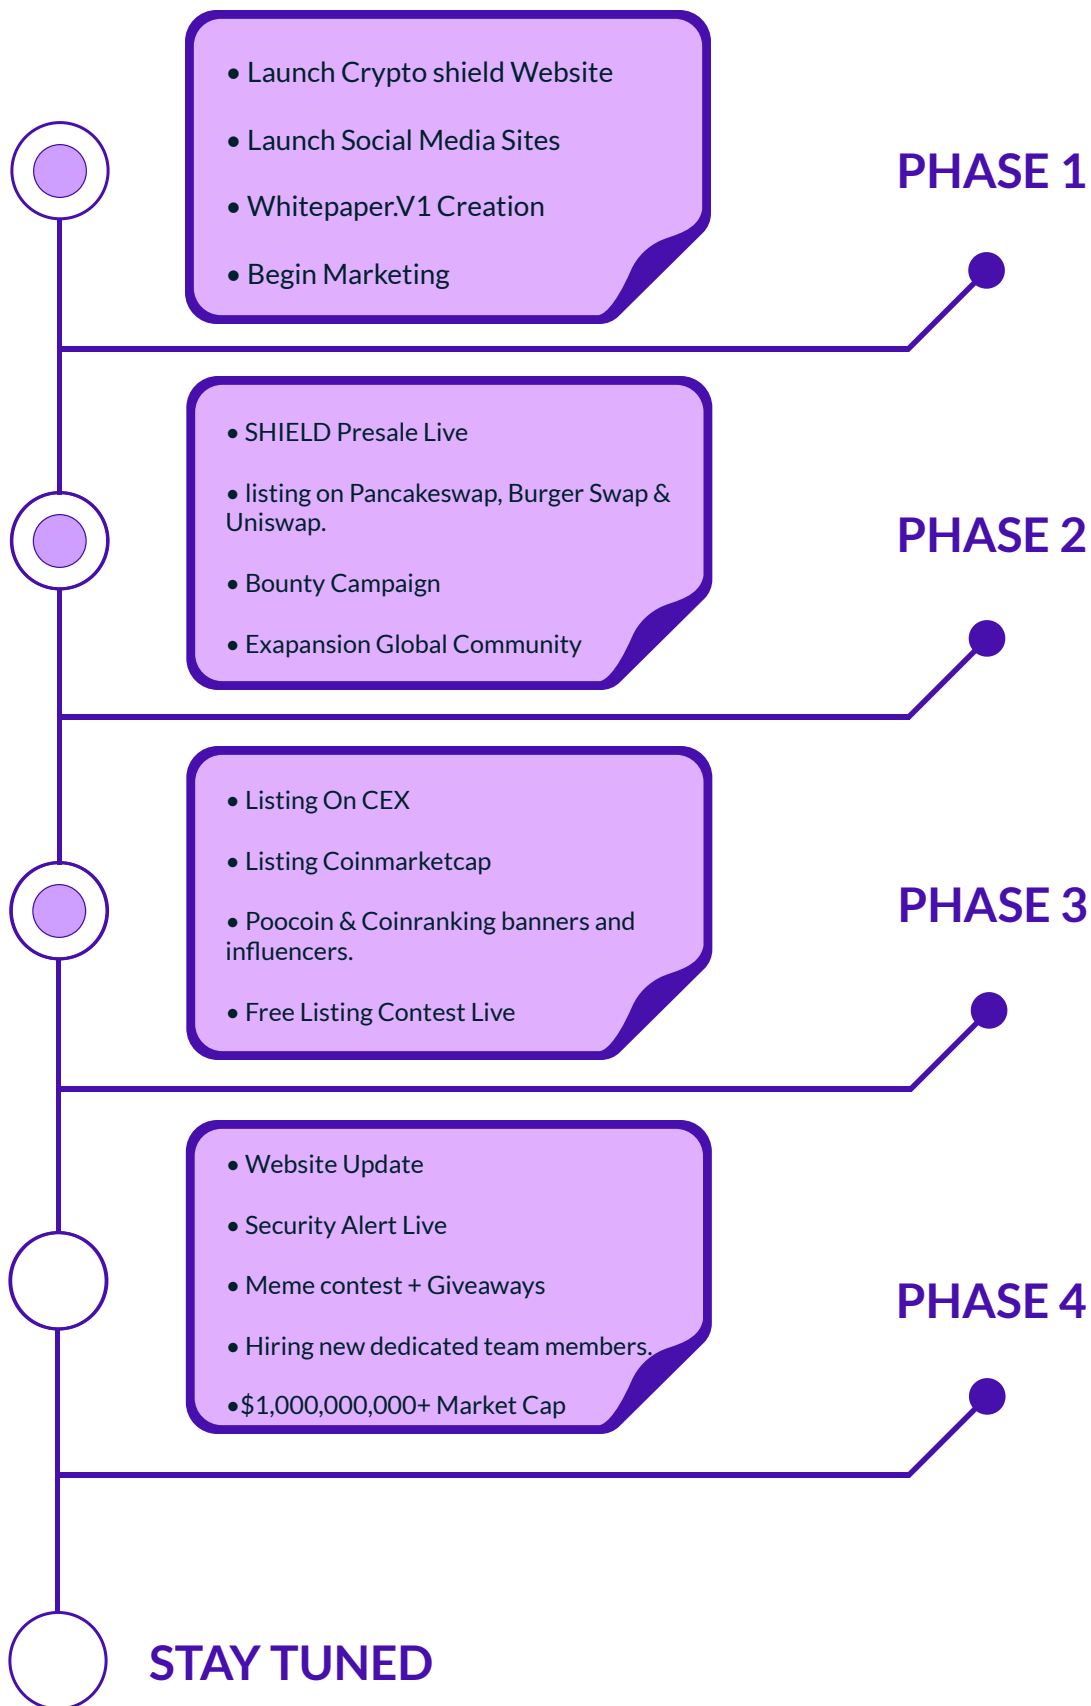

• Staking & Rewards :

Crypto Shield users can stake SHIELD to yield extra interests from the Crypto Shield Earn programs.

Staking on SHIELDEX works in line with the Tiered Launchpad structure by assessing the weight of a token holder's stake to determine the amount of IDO tokens they will be able to receive.
Additionally, standard staking rewards for holding $SHIELD and securing the overall Crypto Shield will apply, whereby token holders will receive rewards for actively taking part in market making and liquidity provision on the swap platform

ROADMAP

PHASE 1

- Launch Crypto shield Website
- Launch Social Media Sites
- Whitepaper.V1 Creation
- Begin Marketing

PHASE 2

- SHIELD Presale Live
- listing on Pancakeswap, Burger Swap & Uniswap.
- Bounty Campaign
- Exapansion Global Community

PHASE 3

- Listing On CEX
- Listing Coinmarketcap
- Poocoin & Coinranking banners and influencers.
- Free Listing Contest Live

PHASE 4

- Website Update
- Security Alert Live
- Meme contest + Giveaways
- Hiring new dedicated team members.
- $1,000,000,000+ Market Cap

STAY TUNED
