INTRODUCTION

Time...

The very movement of our and all other galaxies in the periodic and orbital movement around their respective sun has been defined as the TIME

Some say the distance covered by our very existence towards its ultimate destruction is time

Time can also be defined as the “Ultimate Variable Constant”

Though the scientific formula of time is [**Time = Distance ÷ Speed**] however the distance is not the only factor in our present social and economic era. As our world has economically grown dramatically, now time is calculated both with distance and the energy we burn during rendering our services for ourselves, for our families, for doing every job no matter what.

In fact, every payment every salary every single penny we earn or spend is actually the time. For instance, a workman in a factory is actually paid for his time given to the owner of the factory. In other words that workman is actually selling his time to the factory owner, and subsequently the factory owner sells out that time with some profit (again in time) to the buyers of his factory's product, and the buyers pay for the product from the time they have sold to some other person.

THE IDEA

TIMECENT is an inspiration of Hollywood 2011 Sci-Fi flick “IN TIME”. TIMECENT'S clock is indigenous to the real time. TIMECENT clock tells only the cashable time, the time which is transferable to others and vice versa. TIMECENT owners or Time owners can trade, invest, exchange, buy or sell in time in lieu of cash,

Since time does not possess a physical form, so we have invented currencies and coins of different denominations which otherwise are the physical form of time consumed in a work or service.

The smallest coin denomination e.g. 1 US cent is in fact the worth or the price of the smallest denomination (unit) of time i.e. 1 SECONDS.

U.S Department of Labor (DOL) has fixed the minimum per hour wage @ 7.5 \$/h. by defragmenting this wage into the basic unit of time i.e. 1 SECONDS comes @ .002083\$/sec. hence the monetary worth of an unskilled workman per 1 SECONDS stands @ .002083\$.

WHAT IS “TIMECENT SECONDS (SCND)”

TIMECENT is a unique concept of owning and monetization of time in SECONDS.

SECONDS (SCND) clock does not show the real time, it tells only the cashable time (SECONDS SCND) the time which can be encashed. SECONDS (SCND) owners can trade, invest, exchange, buy or sell in time in lieu of cash.

HOW IT WORKS?

The idea is to launch a clock having on its dial 500 years or 6000 months or 180000 days or 4320000 hours or 259200000 minutes or **1555200000 SECONDS (SCND)**. Each SECONDS having initial monetary worth of 0.00000072250 BNB.

Year	Months	Days	Hours	Minutes	SECONDS (SCND)
500	6000	180000	4320000	259200000	1555200000

For instance, 1 BNB (at current rate) will read on “time owner’s” wallet/dial as

Year	Month	Days	Hour	Minutes	SECONDS
0000	00	16	00	28	03

Total **1384000 SECONDS**

Time owners can transfer, exchange or acquire SECONDS (SCND) from their dial, a specially encrypted and secured App called “Dial” available in either their smart phone or pc.
