POKEMONIO - NFT MARKET PLACE & DEFI HYBRID

Youngsters or middle-aged people of the current era belong to childhood, where the Pokémon is an all-time hit when it comes to adventure and entertainment. Combining this concept with the DeFi Hybrid NFT marketplace is a toast to the pokephilic.

It is more like living under a rock if someone has not heard about the recent craze of the Non-Fungible Tokens (NFTs). Celebrities, digital artists, and other creatives are preparing to publish their work on the blockchain. It is a cryptocurrency that signifies something one-of-a-kind, collectible, and non-replicable.

A shiny Pokémon card is an easy comparison for an NFT. Anyone can make one and make it appear almost comparable to a real one by printing it. But in the mind of a collector, it's not the same. The shiny Pokémon card is valuable to us because of its rarity and authenticity. With an NFT, it's the same. You can, of course, download the NFT's accompanying image or item, but this does not imply that you own it.

Digital artworks, melodies, gifs, and videos are more likely to have their own NFT. NFTs' other financial staking products can even be used to symbolize video game treasures. Because crypto art and NFTs aren't bound to a single format, the sky's the limit when it comes to your new NFT's originality. It all depends on the network you choose to create your token.

Fortunately, most wallets now support Ethereum and Binance Smart Chain (BSC); thus, the difference shouldn't be significant. These are the two most popular blockchains for NFTs. You can send your NFT to someone else directly from your wallet once you've purchased or created it.

Pokemonio token is built on the BSC DeFi ecosystem. DeFi is a movement that uses decentralized networks to turn outdated financial products into transparent and trustless protocols that operate without the use of mediators. The BSC DeFi market has grown to the point where many DeFi Protocols are considering switching to BSC to retain their consumers.

Pokemonio's BSC is a dual-chain architecture that allows them to create their digital assets and decentralized apps on a single blockchain.

Users can also utilize the platform to take advantage of the expanding commerce to move money from one blockchain to another. BSC has seen a substantial increase in activity and volume since its inception.

Pokemonio offers PokeDex and PokeStaking to its users to enjoy an explicit and decentralized exchange. Staking is the technique of locking funds in a blockchain for a set amount of time in exchange for network incentives in exchange for contributing to the blockchain's security.

Most DEXes claim to add value to their coin by offering token holders a piece of the revenue or better liquidity-provider (LP) rewards.

PokeDex - Swap BEP20 Tokens in Seconds

PokeDex is a unique, decentralized token exchange - built on Binance Smart Chain. Users can easily swap different BEP20 tokens - safely, without waiting, paying only a symbolic chain fee. The Swap button will

light up once their approved transaction has been confirmed on the BSC. After that, double-check is needed for the quantities that are entered for your swap, then click "Swap" to complete the transaction. PokeDex is designed in a manner to facilitate its users with the perfect token exchange experience. The procedure is as simple as connecting a wallet, finding the token that they wish to trade (choose from the list or import a token by pasting the contract address), and swapping tokens instantly with just one click.

PokeStaking – Earn Passive Income

The screenshot shows the 'PokeStaking - stake and earn passive income' interface. At the top, there's a navigation bar with 'About Pokemonio', 'Important Links', 'Whitepaper', and a 'Buy Pokemonio on Presale' button. The main content area features a 'Tokens Staking' section with a 'Connected wallet: 0x3Fxxxxxxxxxxxxxxxxxxxxx2' indicator. Below this, there are two staking options:

Earn Pokemonio Token	Recent Reward	APY	Total Staked
Stake Binance Token	184.17 POK	52.99%	40 819.33 BNB
Informations See Token Info View Contract	Your reward 184.17 POK	Tokens value 0.00 BNB	Actions + Stake Tokens Now

Earn Pokemonio Token	Recent Reward	APY	Total Staked
Stake PancakeSwap Token	0.00 POK	42.94%	17 982.55 CAKE

Additional actions include 'Harvest' and a 'Max' dropdown for the stake amount.

Through PokeStaking, users can generate passive income through PokeNFTs and POK tokens to verify transactions on a blockchain network. Staking is not the same as crypto mining, but both can generate higher returns than a traditional savings account. Stake

different BEP20 tokens on the PokeStaking platform and earn passive income in POK tokens. The more tokens you stake, the more you make. You can withdraw your reward and staked tokens anytime. Staking with PokeStaking may be just as rewarding as mining and trading but without the danger. Essentially, users must purchase and keep some tokens before adding them to the mining pool to minimize the risks. People who hold tokens can often supply them for other users to validate transactions on networks that support crypto staking, earning a percentage of the profits.

POKENFT MARKETPLACE: BUY AND SELL NFTS

PokeNFT is a decentralized marketplace for buying, selling, and digital trading goods - like gaming items, art, music, videos, images, and more which are built on NFT technology and run on the Binance Smart Chain. NFTs can eliminate intermediaries and connect content creators and audiences directly by enabling digital representations of particular goods mixed with the benefits of smart contracts, providing blockchain-generated certificates of authenticity for digital assets. As a result, the concept of NFTs can radically alter the present crypto and art ecosystem. The Swap button will light up once your approved transaction has been confirmed on the Binance Smart Chain. After that, double-check the quantities you've entered for your swap, then click "Swap" to complete the transaction.

- ❖ Choose between different crypto wallets and connect to our NFT Marketplace.
- ❖ Create and set up your own NFT collections. Add social links, descriptions, images, and set a secondary sales fee.
- ❖ Upload your work (image, video, audio, art, etc.), add a title and description, and customize your NFTs with properties, stats, and unlockable content.
- ❖ Choose how you want to sell your NFTs - use auctions, fixed-price listings, or declining-price listings.

❖ Sell your NFT and receive crypto to your wallet!

WHAT DOES POKEMONIO OFFER?

Pokemonio offers a wide range of facilities for its users. It combines all the knacks that a crypto user is looking for. It provides a seamless and hurdle-free exchange system on BSC. PokeDex allows the user to exchange their tokens with new liquidity rapidly. Not only this, but the platform also offers to stake in the pools and get higher chances of rewards and passive income. A personalized NFT marketplace is straightforward and convenient to buy, sell, and trade NFTs through Pokemonio. Moreover, PokeLaunchpad and PokeLending enable the users to attain high capital from the initial stages of the token sale and gain specific interest rates. Last but not least, in order to provide entertainment and a fun experience to its users, Pokemonio is also offering PokeGames and earning POK tokens as a reward.

Here is a list of what Pokemonio offer to facilitate its users:

- ❖ PokeDex Exchange
- ❖ PokeStaking
- ❖ PokeNFT Marketplace
- ❖ PokeLaunchpad
- ❖ PokeLending
- ❖ PokeGames

1. PokeDex Exchange

Binance Smart Chain exchange (based on the AMM model) will allow all crypto users to exchange tokens and add new liquidity quickly.

2. PokeStaking

Deposit and stake LP tokens in our PokeStaking pools and earn high passive income. You will receive a reward in POK tokens.

3. PokeNFT Marketplace

Our peer-to-peer NFT marketplace will allow users to buy and sell rare digital items and crypto-collectibles from leading creators and brands.

4. PokeLaunchpad

New blockchain-based projects will have the opportunity to raise capital from early-stage token sales conducted in our Launchpad.

5. PokeLending

Gain specific interest rates for lending crypto assets or fiat currency to borrowers with PokeLending. It is an easy way to earn extra POK tokens.

6. PokeGames

Our PokeGames will allow users to have great entertainment and win additional POK tokens as a reward for playing.

WHY POKEMONIO?

Like any other BSC DeFi ecosystem, Pokemonio also necessitates flexible, secure, rapid, and low-cost performance, opening more chances for new services, a more significant number of collaborating partners, and greater economic value expression. The business environment should be decentralized, open, and dependable.

It should also be safe, automated, and combine sales from physical world relationships and experiences to the internet's possibilities for retail, promotion, activation, engagement, connection, and sales transactions and actions. It is feasible to employ more advanced technologies that can sense, respond, measure, communicate, locate and inform; while working in a digital environment, it seems pretty tricky and challenging to work while everything is digital and virtual.

With the perspective of transformation and digital inclusion, Pokemonio considered that cryptocurrency as a social currency with circularity becomes an attractive possibility for society subsistence that activates the economy and generates income, especially if the platform is flexible and allows multiple functions.

POK tokens will be digital representations of value that their owners use as a payment method. It provides its users with the features that regular currencies don't. Its distinguishing characteristics include transactions attached to a random sequence of characters rather than the owner's identity. The popularity of several virtual currencies reveals the size of supply and demand. Fees and restrictions that may be disadvantageous

to users are eliminated because of the lack of government oversight and regulations. Authorities and financial organizations have little control over the flow of bitcoin transactions. It restricts the use of unfavorable fees and terms.

POK tokens can be held in safe, private keys and virtual wallets. It means that only the holder has access to the collected tokens or the NFTs. Pokemonio is using encryption technologies on its storage devices to boost security. Virtual currency trade does not take place in a single location. It keeps trading from being disrupted after a hacking attempt.

The data from transactions are spread over the network and stored directly by token holders.

- ❖ Secure & Safe
- ❖ Liquidity Locked
- ❖ Token Redistribution
- ❖ Monthly Burning
- ❖ Passive Income
- ❖ Fast Transactions with Low Fees

Secure & Safe

A top specialized company has a fully audited Pokemonio smart contract. Therefore, the community can feel 100% safe.

Liquidity Locked

After Pokemonio listing on the exchange, liquidity will be locked on the Unicrypt network for an entire year, so investors do not have to worry about their funds.

Token Redistribution

2% of each transaction will be redistributed as token holders and marketing rewards.

Monthly Burning

Every month, the Team will proceed with manual token burning, which will gradually increase the value of the Pokemonio token in the future.

Passive Income

After staking and lending implementation, holders will have the opportunity to earn an additional passive reward - paid in Pokemonio tokens.

Fast Transactions with Low Fees

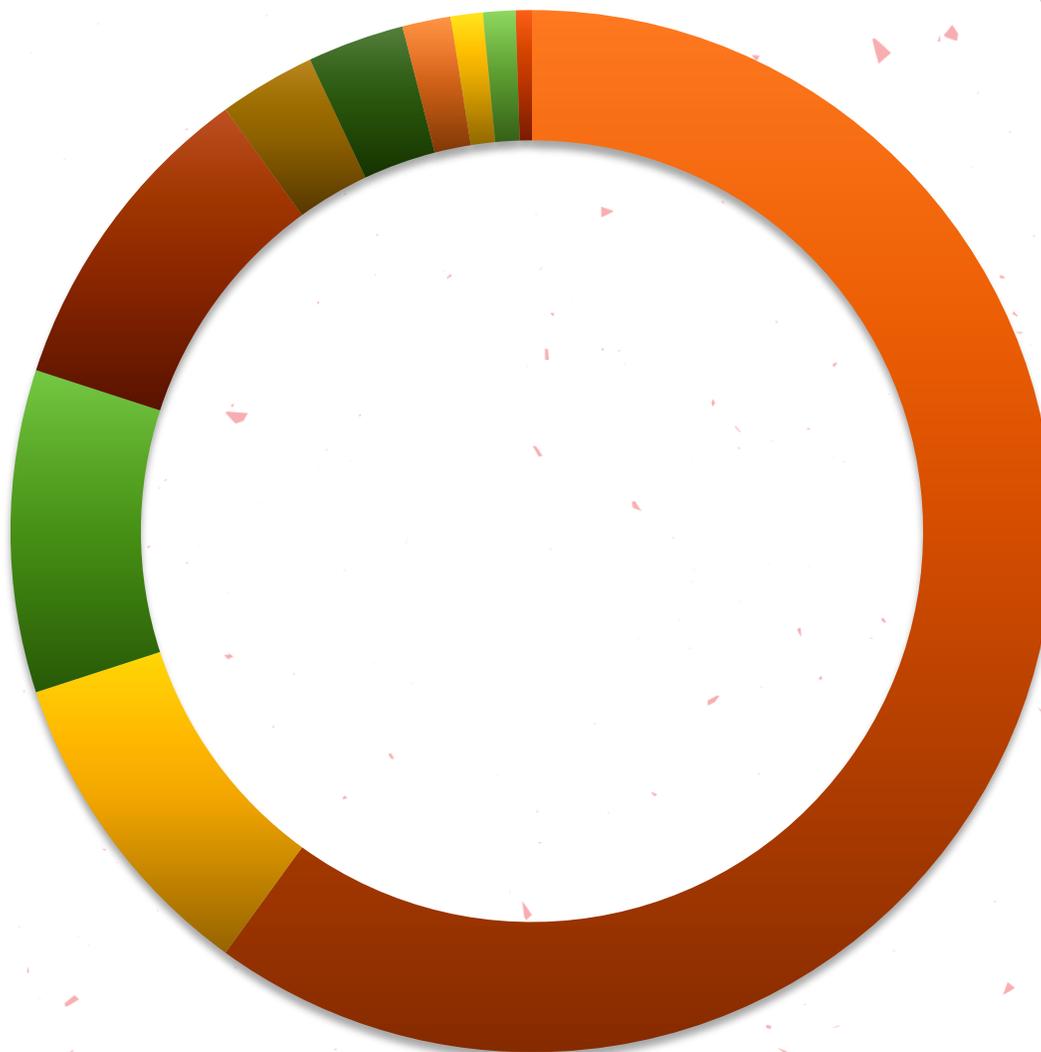

Since Pokemonio works on a Binance Smart Chain - users can complete transactions in seconds, paying meager transaction fees.

POKENOMICS

POK Max. Supply: 500 000 000

- ❖ 300 mln POK - Locked for PokeStaking, PokeLending, PokeNFT, PokeGames rewards (60%)
- ❖ 50 mln POK - Pokemonio Token public pre-sale on website (10%)
- ❖ 50 mln POK - Pokemonio Token public sale on Pinksale.Finance (10%)
- ❖ 50 mln POK - Liquidity lock (10%)
- ❖ 15 mln POK - Promotion and Advertisement (3%)
- ❖ 15 mln POK - Exchange listings (3%)
- ❖ 7.5 mln POK - Development (1.5%)
- ❖ 5 mln POK - Reserve (1%)
- ❖ 5 mln POK - Airdrops and Bounty campaign (1%)
- ❖ 2.5 mln POK - Team (0.5%)

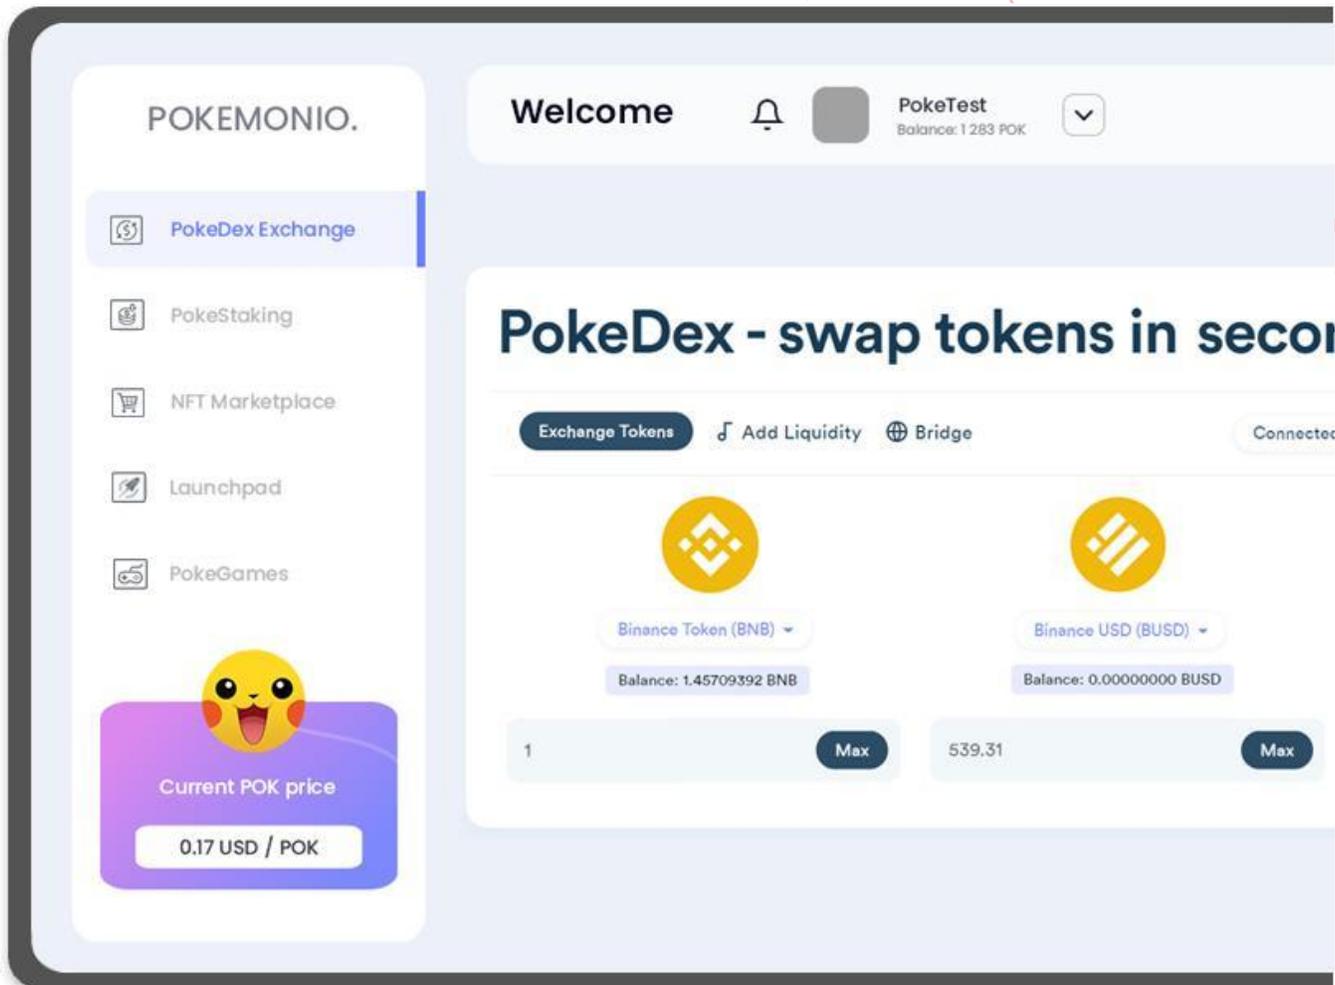

- PokeStaking, PokeLending, PokeNFT, PokeGames 60%
- Pre Sale 10%
- Public Sale 10%
- Liquidity Lock 10%
- Promotion and Advertisement 3%
- Exchange Listing 3%
- Development 1.5%
- Reserve 1%
- Airdrops 1%
- Team 0.5%

POKEAPP - ALL POKEMONIO PRODUCTS IN ONE PLACE

We plan to create a modern and intuitive application called "PokeApp," in which you will be able to manage your POK tokens and use all available products easily.

- ❖ The application will be available in both - computer and mobile versions.
- ❖ Main advantages of the application:
- ❖ Possibility to connect various wallets - including the most popular - such as Metamask, Binance Wallet and TrustWallet
- ❖ Quick access to all Pokemonio products - like Staking, Exchange, Games, and more
- ❖ Ability to track the current price of a POK in live

POKEMONIO ROADMAP 2021/2022

Phase 1 - Project Idea and Launch

- ❖ Project idea
- ❖ Setting up a Team and development start
- ❖ Website Launch
- ❖ Whitepaper release
- ❖ Roadmap Release
- ❖ Pokemonio Token (POK) contract creation
- ❖ Third-Party Contract Audit
- ❖ Private POK sale
- ❖ Bounty Campaign
- ❖ 1,000 POK Holders

Phase 2 - Public Sale and Project Growth

- ❖ Marketing and Promotion Campaign
- ❖ Public POK Sale
- ❖ Pancakeswap exchange listing
- ❖ CoinMarketCap listing
- ❖ Coingecko listing
- ❖ 5,000 POK Holders
- ❖ 10,000 Telegram Members

- ❖ 10,000 Followers on Twitter
- ❖ First partnerships
- ❖ First CEX listing

Phase 3 - Products Launch and Project Expansion

- ❖ PokeDex Exchange launch
- ❖ PokeStaking and PokeLending launch
- ❖ Top 20 Exchange listing
- ❖ 20,000 POK Holders
- ❖ 20,000 Telegram Members
- ❖ 20,000 Followers on Twitter
- ❖ Influencers Marketing

Phase 4 - Next Products Launch and Marketing

- ❖ PokeNFT Marketplace launch
- ❖ First PokeGame release
- ❖ PokeApp application launch (PC/Laptop version)
- ❖ 50,000 POK Holders
- ❖ Top 10 Exchange listing
- ❖ Feature Products Development
- ❖ Roadmap v2 Release

LEGAL DISCLAIMER

Pokemonio prepared this white paper to provide interested parties information about PokeNFTs and the native token for trading on the Pokemonio platform (the “POK Token”). This disclaimer should be read in conjunction with this white paper. Pokemonio reserves the right to introduce changes to this white paper. If there are any differences between the versions of this white paper, the latest version of the white article published on our website <https://pokemonio.com/> shall prevail. All previously published versions are considered invalid. This white paper is not and should not be regarded as any form of legal, financial, tax, or other professional advice. You should seek independent professional advice before making your own decision as to whether or not to receive any POK Tokens. You are responsible for any evaluations, assessments, and decisions you make about purchasing the POK Tokens.

The tax characterization of POK Tokens is unclear. Accordingly, the tax treatment to which they will be subject is uncertain. All persons who wish to receive POK Tokens should seek independent tax advice before accepting any POK tokens. Pokemonio does not represent whether any tax consequences may arise from purchasing or holding POK tokens. This white paper, together with any accompanying verbal presentation, does not comprise a prospectus or admission document and does not constitute or form part of, and should not be construed as, an offer or invitation to sell or any solicitation of any offer to subscribe or purchase

any shares or other securities or any other entity by which projects promoted by POK are to be held and/or developed. This white paper and any part thereof may not be distributed or otherwise disseminated in any jurisdiction where offering tokens in the manner set out this white paper is regulated or prohibited. In some jurisdictions, and distribution of this white paper and the offer and sale of POK Tokens or PokeNFTs may be restricted by law. It is the responsibility of each recipient of this document to inform themselves about and to observe any applicable legal requirements. By viewing this white paper or purchasing POK Tokens, you represent and warrant that you are legally permitted to do so and assume all responsibilities for complying with applicable laws and regulations. No representation or warranty, express or implied, is given by or on behalf of POK as to the accuracy or completeness of the information or opinions contained in this document. No responsibility or liability whatsoever is or will be accepted by POK for any loss howsoever arising, directly or indirectly, from any use of such information or otherwise arising in connection in addition to that. By accepting this document, each recipient agrees that the information contained in this document may not be used by it for any purpose other than the recipient's consideration of POK and its proposed projects as referred to in this white paper. The acquisition of POK Tokens does not represent any form of share or security and does not confer any right to any dividend interest or similar financial entitlement.

The POK token is a BEP-20 token. Cryptocurrency markets are highly volatile. POK Tokens are intended for people familiar with dealing with

cryptocurrency, security tokens, and blockchain-based software systems. Pokemonio makes no guarantees as to the current or future value of the POK token concerning any other digital asset or store of value. POK's performance may be interrupted, suspended, or delayed due to force majeure circumstances. POK token holders are responsible for their security and should ensure that they use an excellent digital wallet or vault to store their POK tokens. Failure to properly maintain or use an appropriate digital wallet or vault may result in the loss of POK Tokens. Pokemonio accepts no liability for the actions of hackers or other malicious groups or organizations that may attempt to interfere with our website or the POK Token in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing, and spoofing.
