

Catcoin White Paper - Every Detail About The Catcoin

Highlights

- Catcoin is a cryptocurrency created on Binance Smart Chain, a blockchain with fast transactions.
- Catcoin Short code [**CATCOIN**]
- Contract -
0x3e362283b86c1b45097cc3fb02213b79cf6211df
- Total Supply- **100,000,000,000,000,000**
- Catcoin is a deflationary cryptocurrency which means that it has a limited supply.

- Catcoin is a token used for the Catcoin community and ecosystem.
- Catcoin is a community-driven project.
- Catcoin will incentivize the token promoters and helpers in the long term.
- DAO governance makes Catcoin unique from most of the other cryptocurrencies.

What is Catcoin?

Catcoin is a digital currency that uses cryptography to secure transactions. It is built on Binance decentralized network of computers worldwide that manage the Catcoin transaction.

Using Catcoin, you can send money directly to friends and family without going through an intermediary like a bank or PayPal. You can use it to buy products or services online or trade for other cryptocurrencies.

Catcoin and other cryptocurrencies are digital assets because they are virtual and have a monetary value. As such, they are sometimes called "cryptocurrencies". They share many characteristics with traditional currencies, so people often refer to them as "digital cash".

Motivation

Catcoin's primary mission is to create a community of cat lovers and supporters interested in cats. Catcoin also launched an initiative to assist Animals shelters via donations and develop new defi products.

Catcoin uses Binance Smart Chain as its main chain, which is faster, cheaper than Ethereum, and has a more extraordinary ability for scalability. In these times, many people are still unaware of the qualities that DeFi can bring to our day-to-day lives, such as low-cost transactions, decentralization and unregulated environments. These characteristics make your assets more secure than any bank can guarantee you today.

However, several obstacles impede the path to mass adoption; moreover, some solutions (such as Metamask) have been put forward to help with this problem.

Value Proposition

The Catcoin Token is a decentralized token running on the Binance Smart Chain. The fixed supply of 100,000,000,000,000,000 tokens will be distributed under the provisions of this White Paper. The Catcoin Token is used to receive, send and store value.

Features and Specifications

- Catcoin is built with a Proof of Holding concept, which rewards its loyal holders. This is how it works:
- Every transaction using \$Catcoin is subject to a 2 per cent deduction, distributed among our pool of holders.
- Simply holding it will result in the number of tokens automatically increasing every day as the community transacts, which will continue indefinitely.
- It is built, so that big wallet holders (whales) are discouraged from trying to influence the market in their favour or from selling out.

Governance

Catcoin is a deflationary token. Every time a transaction is made, a certain percentage of the transaction will be burned. Over time, the number of tokens in circulation will decrease and ultimately lead to the value of each remaining token increasing.

Catcoin is an open-source software project. The program is offered in a transparent manner that enables for the independent verification of binary and their accompanying source code to be performed on the software.

Catcoin is a community-driven project with no central authority or developer team with arbitrary decision-making powers over changes to its protocol or governance structures. Any agreement among developers must come through a consensus to change core protocol rules or add new features.

Tokenomics

97 per cent of our supply has been listed on Pancakeswap for the general public to purchase, with 3 per cent reserved for marketing promotions and listing.

There is an 8 percent fee taken from every sell transaction. Of that, six percentage points go toward providing liquidity in smart contracts, and two percentage points go to holders of tokens currently in circulation (that means you). This two per cent will reduce over time as more transactions, and fewer tokens are available.

Project Roadmap

We are launching the Catcoin on a decentralized exchange platform called Pancakeswap. We will acquire 5000 holders as of now, and our focus is to build a strong community around the Token. Once we have a community built around it, we will list Catcoin on centralized exchange platforms such as BITFOREX,

HOTBIT, OKEX etc. We will also be doing strategized marketing and promotion for the Token to make them known in the crypto space.

In phase 2, we will be launching on coinmarketcap and coingecko, allowing us to get more exposure and awareness among people interested in DeFi tokens. In addition to that, our goal is to reach 10000 holders by this time.

Once we reach our target number of holders, 10,000, we will launch Catcoin DAO (Decentralised Autonomous Organisation). Our community members (meaning you) will be equally involved in deciding the other roadmap of Catcoin.

Partners/Supporters

- PancakeSwap: Next is the popular Pancakeswap exchange that integrated CATCOIN early after its launch. Follow this link to trade your tokens:

<https://pancakeswap.finance/swap?inputCurrency=0x3e362283b86c1b45097cc3fb02213b79cf6211df>

- **BITFOREX-** Bitforex is a very popular Centralize exchange and early supporter of our project
- **Binance Smart Chain:** Here you can find the link to download the Trustwallet wallet application, which will allow you to access Binance Smart Chain quickly, bypassing cumbersome registration procedures of creating wallets or meta-mask browser extension install and configuration (<https://trustwallet.com/>)
- **Coinmarketcap:** We collaborate with CMC so that soon you can add our Token as part of your portfolio in the app or keep track of it online <https://coinmarketcap.com/ru/currencies/catcoin/>.
- **Coingecko:** As one of the most respected media platforms for cryptocurrencies, we are also featuring our coin there.
- **DEXT:** Track LIVE CATECOIN STATS, You can access it in your browser, enter <https://www.dextools.io/app/bsc/pair-explorer/0x2269843fc9e05dec6ec1c1fbd844eb9ddb13a047> and check stats.

Catcoin Team

The Catcoin team is a mystery for now, but the team has shown that they are a very talented group. They have experience building Defi products and are also connected with centralized exchanges, which will help

them promote the project. Since this project is designed to be managed by DAO, token holders will be considered core members of the team who participate in decision-making after a specified period. We expect this distribution model to be able to build trust between community members and make sure the platform is available for everyone. Do you want to know more about our project? Then join us on Twitter or Telegram!

BUY CATCOIN AND BECOME A MEMBER OF OUR COMMUNITY

In the meanwhile, CATCOIN is accessible on PANCAKESWAP and BITFOREX, and it may be acquired by sending a payment to our contract address:

0x3e362283b86c1b45097cc3fb02213b79cf6211df

Visit catcoin.cash to find out more about BUYING Instructions.
