## ***Introduction:***

How can a project disrupt the ongoing NFT market? How can we make NFTs easily accessible to everyone anywhere hassle free?

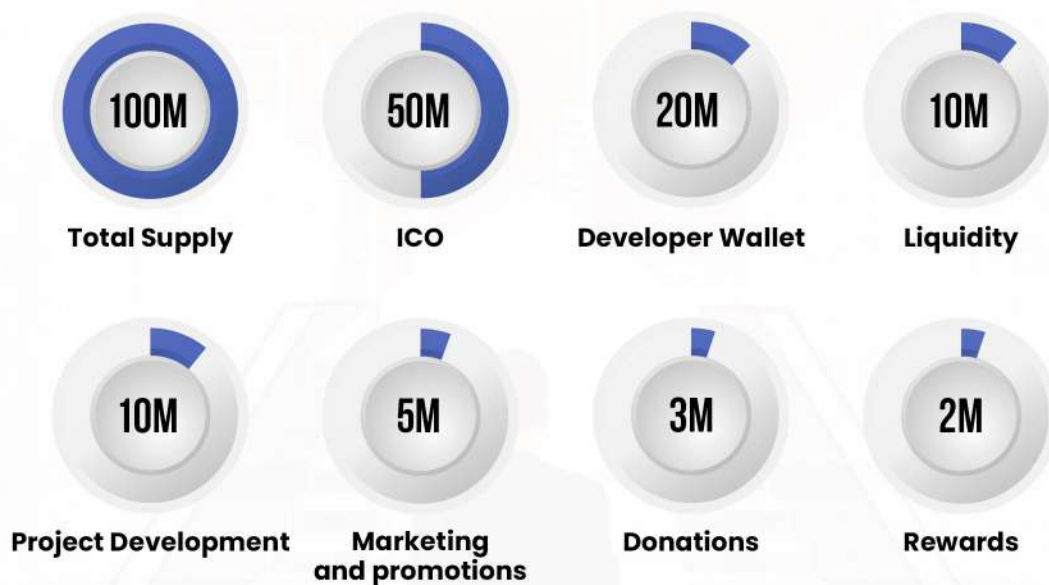

While being a Decentralized and Deflationary token we aim to give back to our community, our Holders, the roots of this projects. Launching a CEX and DEX will be the prime focus of the project to reward our community with immense gains as we care about them. We strive to secure the future of our day ones and our community together. Our Aim with Sure Finance is to build a block chain that eradicates all the existing loopholes in the currently used NFT block chains and Marketplaces be it high transaction fees, delayed transactions, scams and rug pulls. \$SURE believes in interoperability so we will support other block chains also and create a better functioning ecosystem of NFT markets globally.

***"Ensure to secure your Future"***

## TOKENOMICS:

Sure Finance has a Tokenomics structure that has been formulated keeping in view the contemporary needs of a project to be successful and as well as the community of the project to be prosperous in parallel.

After ICOs are done the remaining tokens will be 30% burnt manually in different events. While 70% of the tokens will be locked for future products.

## ICO:

There will be three Initial Coin Offerings in the near future upon different platforms to seed the project as well as to benefit the initial investors coming on board.

The prices will be set as following in the 3 ICOs respectively.

- 1 1st-ICO-0.007\$
- 1 1st-ICO-0.007\$
- 1 1st-ICO-0.007\$

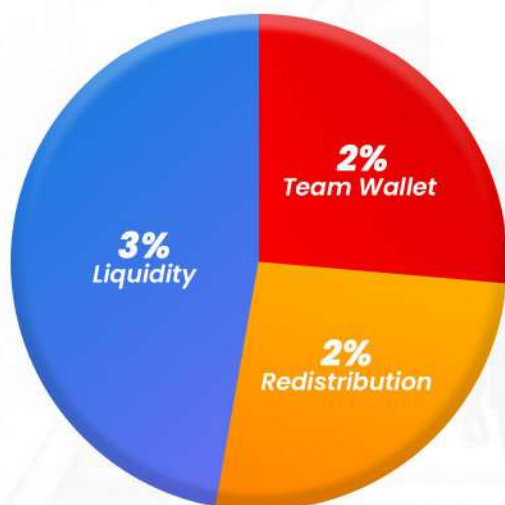

**Listing price of Sure Finance will be 0.01\$.**

The dates of ICOs will be announced at Sure Finance Official different community channels respectively. Our initial Sure Family would already be in profit as we go towards listing.

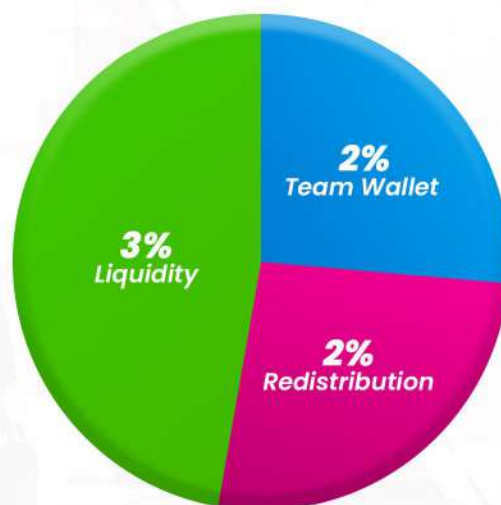

## **Transaction Fee Summary (DEX):**

**Buying Fee (7%)**

**Selling Fee (7%)**

There will be three Initial Coin Offerings in the near future upon different platforms to seed the project as well as to benefit the initial investors coming on board.

The prices will be set as following in the 3 ICOs respectively.

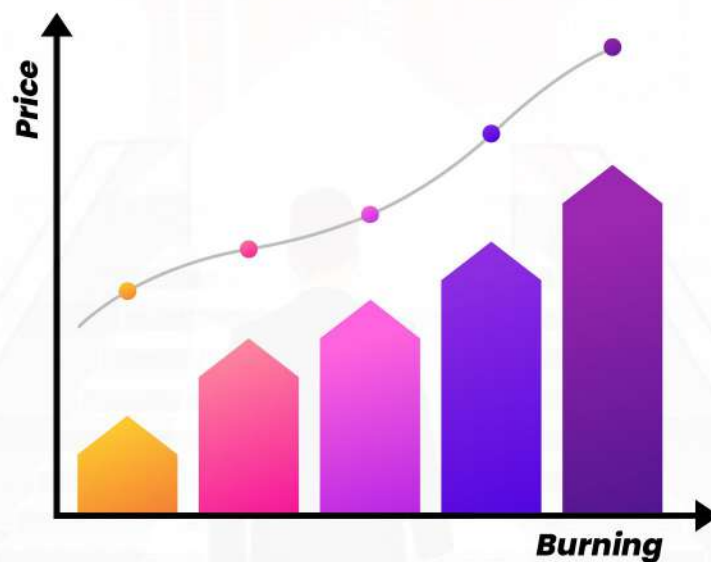

***"Be sure to grab us in time because it waits for none"***

## **Manual and Buy Back Burns:**

Token being a deflationary one results in a rather new but effective and powerful way of price impact in a positive way to give maximum of benefits to the holders. This concept of decentralization as well as deflation where the supply of token will be constantly decreasing, and the price of the Token will be increasing.

Both being inversely proportional as shown in below graph.

More than 10 Million tokens will be burnt manually. Buy back burning will be done to further decrease the supply and maximize the positive price impact by the team to give Holders a constantly decreasing supply both beneficial for the price and the community.

## ***Automatic liquidity:***

\$SURE has a system of auto generation of liquidity pool. Most percentage of the transaction fee is allocated to the liquidity pool.

In the Buying Fee 3% is allocated for this purpose and in the Selling Fee the maximum of 3% is allocated.

This has benefits as it increases the total liquidity of the \$SURE and also supports the floor price of the token.

This decreases the selling pressure and helps to alleviate some of the price drops. The structure also helps as an anti-dumping measure where any whale aims to sell and fluctuate the price, The 3% liquidity addition comes handy. The Pancakeswap liquidity of the project will also be locked for the surety and safety of our holders and believers of \$SURE. It will prevent any delays or any errors in transactions as we believe in user experience to be the best and in no manner the believers of this Mission to be distressed.

***"Buy when there's Blood on the streets"***

## **ECOSYSTEM**

\$SURE doesn't bring gains without any useful purpose, we believe that if someone focuses on the core purpose of excelling and breaking the limits with sheer hard work then profits and gains will come eventually as a byproduct. \$SURE is not just a token, when we say Sure Finance, we refer to an ecosystem that comprises of all the different elements of crypto.

## **BARTER:**

We respect the society we live in and we would like to contribute our fair share in it. Decentralized Exchange of \$SURE is called Sure Barter. It will be a major key factor in helping the underrated projects with great vision and plan of action. It will help boost the community, creators, developers, holders as well as crypto on the whole resulting in healthy competition. We will provide these projects with our own Barter to increase their volume and grow their project through the exposure of our Sure Barter buyers and holders. Sure launch pad and Wallet will also be launched to facilitate upcoming projects and manage the holdings.

This will be beneficial for the community equally as promising projects will be provided from the platform of \$SURE while uplifting itself, the projects and most importantly the holders. Making it a win-win situation for everybody.

## **CEX:**

Centralized Exchange is a major part of \$SURE ecosystem. We try and identify problems that need solution and provide them with that. With its Centralized Exchange, Sure Finance aims to build a platform that solves the problems of different global markets while being in cooperation with those market officials. Different governments are hesitant to crypto and are fearful of scams, this can be easily solved with talks and education as crypto is beneficial for everybody and so it should be accessible to everybody in every way.

Our target here is to make those arrangements in which there is consensus between the officials and Sure to make a healthy working relationship. This Centralized Exchange will be a business opportunity and an investor in the markets while also changing lives of the people of those markets. Untapped markets will be the priority of Sure Finance in the case of Centralized Exchange because it will help us capitalize the market and educating the natives regarding these digital assets through our promotion on different platforms.

***"Different nature of problems require different set of solutions"***

## **Block Chain:**

An out of the box Block chain is Foundation of the vision of the project. \$SURE is eager to bring a first of its kind NFT Oriented Block chain.

By bringing this we want to solve the existing problems and provide solution to the upcoming problems in the space where its going to be big in the future.

We see the NFTs space being much bigger than it is now. NFTs are only being seen as a technology for launching JPEGs or videos for a price and flipping those for more price but NFTs could be used for smart digital contracts, Music, Movies, Digital Art of any form or kind. This could solve the global piracy and infringement issues that United Nations or World Trade Organization has failed to solve.

This big of technology needs something that tends to support it in any way possible. None of the existing Block chains are fundamentally designed in order to make them solve the issues with NFTs.

This is where \$SURE comes in play with the first NFT Oriented Block chain that will have no existing problems of high gas fees, delayed transactions

***"Dream Big to achieve Big."***

## ***The SURE Metaverse:***

In a world where people are increasingly using the internet as their main form of connection and self-expression, the metaverse is logically the next step in the way we create, consume, and interact digitally. Decentralized networks (cryptocurrency) provide an unparalleled degree of assurance and security with finances in response to a decline in trust towards institutions. It appears inevitable that cryptocurrency may play the most important role in the emergence of the metaverse. \$SURE aims to anticipate this coming evolution revolution by combining cryptocurrency with the metaverse and building an ethical, decentralized, entertaining, and innovative project: The \$SURE Metaverse.

\$SURE will be used as the medium of exchange within the metaverse. It will be used to buy, sell, trade, and modify in-game assets. In addition, \$SURE will be used as points of entry for various areas of the metaverse, for accessing games, virtual concerts and clubs, media, entertainment, education, modes of travel in the metaverse, investing in virtual real estate, mining for materials in-game, paying other players for services, social experiences, programs, and really anything else that a currency can be used for in the physical world, but virtual. It is a digital currency for the virtual world. Soon, Metaverse will be a Trillion \$ industry and it will create Millions of Millionaires, we are just here to act as a catalyst.

## ***Key Features:***

The unique feature of \$SURE Metaverse is to ensure the benefits of buyers who are buying in high volumes in metaverse utilizing \$SURE Token as a currency whether they are buying lands, attending concerts, or travelling in \$SURE Metaverse, we allocate them whitelist of our NFT's Projects that are to be launched on our NFT platform according to there buying volume in \$SURE Metaverse.

***"Metaverse is  
the future of our reality"***

## **NFT Platform:**

This is the biggest and foremost element of \$SURE ecosystem. Building an NFT platform from scratch that runs on \$SURE Block chain. There is plenty of room in the Market for a new platform to be functional but also running on the Block Chain that is its own will be quite effective and exemplary. Of course, an NFT Oriented Block chain needs its own NFT platform and Sure's NFT platform will serve this purpose. This NFT platform will be the first of its kind in terms of the freedom of creators and buyers, that we can only do if its on our Block Chain as the changes that we are trying to implement are not compatible with any of the existing Block Chains. We want to make it big by making the projects on this NFT platform reach the smallest investor that desires to be a part of the project or wants to flip his life by flipping NFTs. We plan to launch \$SURE NFT cards which will generate \$SURE when staked on our NFT platform. These will be limited so the opportunity will be rewarding for anyone that grabs onto them. The team doesn't want to disclose our vision as of what changes we want to execute in this NFT platform because that makes us unique and trust us it will revolutionize how people look at NFT platforms. NFTs are usually considered a Rich Man's sport but we want to change this and give benefits to smaller investors so they could be someday the head of the table. This platform is the secret sauce of our project and yet it will remain a mystery as to what changes we plan to do but with the passage of time, team will reveal all the details.

***"Revealing every move is not the smartest move"***

## Rewards:

Engaging and giving back to the community is as important as breathing for this project. This vision of \$SURE can never be accomplished via any other route than Sure Family. We are more than happy to tell you that 2% of every \$SURE transaction will be redistributed back to the holders of the project. Increasing the number of tokens so you may never settle for less. This redistribution will be dependent on the volume of trade and the number of tokens held by a wallet. The more the holding of tokens, the more the reward. Airdrops will be a major key in distribution of the project initially while promoting the project. There's a 2% allocation of total supply for rewards. Manual rewards and presents for the community will be awarded at different times randomly depending upon the contribution of the person or the engagement of the person with the community also there will be random distribution of rewards at different occasions to help for better interaction, cooperation and encouragement of \$SURE Family.

***"There's no greater reward than changing lives"***

## ***Safety for Investors:***

Prime importance in the Ecosystem of \$SURE is safety of the ones that believe in us, that's our family and family need to be protected. We understand that it is a mutual relationship of trust that's why we took certain measures to ensure your safety, our safety.

The developer team wallets have been vested for a time of a year before that no one can sell even a token from the developer team. We will work tirelessly for this project to reach out of its limits while being vested in this project as you all are.

Project took anti-dumping and anti-whale measure in terms of transaction model of automatic liquidity. There will be a buying limit to increase the number of holders and decrease any number of whales, so none can buy big chunks of the project that have been resulting in massive dumps that projects never tend to recover. This can be tolerated by the anti-dumping measures.

There will a selling limit that a wallet can only sell 1% of the total supply of the token in 1 day, this applies to both the team and community which increases safety and deepens trust in between \$SURE Family. Funds will be Allocated for emergency dumps in case if there is one under any circumstances. We want to take every precaution and measure to ensure that there is never a situation that is damaging or harmful for the project, so emergency funds will also be reserved. These bylaws and measures make the safety of our investor and project to stand any blow, any wind, and any rain like concrete. Be a part of us to Ensure your Future with Sure.

***"Safely but surely, we'll reach there"***

# ROADMAP

## Q1 2022

- ENVISAGING IDEA
- ASSEMBLING TEAM FOR PROJECT
- DRAFT WHITEPAPER AND ROADMAP CREATED
- FINALIZING PROJECT NAME LOGO TOKENOMICS AND TOKEN DISTRIBUTION
- DEPLOYING SURE FINANCE TOKEN ON BSC
- START AIRDROP CAMPAIGN
- SETUP TELEGRAM TWITTER INSTAGRAM DISCORD REDDIT GITHUB MEDIUM AND YOUTUBE CHANNELS FOR PROJECT
- FINALIZING WEBSITE DEVELOPMENT
- LAUNCH PRESALE
- START MARKETING AND PROMOTION IN ASIA

## Q2 2022

- IPANCAKESWAP LAUNCH
- START PROMOTIONAL CAMPAIGN WITH BIG INFLUENCERS
- AIRDROP DISTRIBUTION
- 1st AUDIT BY REPUTED AUDITER
- P2PB2B LISTING
- SMDEX LISTING
- CMC LISTING
- CG LISTING
- START WORKING ON DEVELOPMENT OF SURE BARTER [DEX], LAUNCHPAD AND STAKING PLATFORM

## Q3 2022

- LAUNCHING SURE BARTER AND SURE LAUNCHPAD
- LAUNCHING SURE STAKING PLATFORM
- START DEVELOPMENT OF SURE WALLET
- START DEVELOPMENT OF SURE EXCHANGE
- HOTBIT LISTING
- BITMART LISTING

## Q4 2022

- LAUNCHING SURE WALLET WITH FULL INTEGRATION OF SURE ECOSYSTEM
- LAUNCH OF SURE EXCHANGE
- STARTING INTERNATIONAL PROMOTION
- LISTING ON TIRE 1 EXCHANGES
- START DEVELOPMENT OF SURE BLOCKCHAIN AND SURE NFT..... PLATFORM
