DISCLAIMER

The CasinoXMetaverse, also known as "\$Casio," is an ecosystem and Metaverse based gambling and casino project and web 3.0 platform produced by our team. The information in the offering statement is more comprehensive than what we provide now, and it may differ significantly. As a result, it is strongly advised that you read the paperwork before investing. Only the offering statement is being used to make the offering. This whitepaper is not an offer to sell or buy these securities, nor is it a sale of these securities in any state or jurisdiction. Before registration or qualification under the securities laws of any such state or jurisdiction, such an offer, solicitation, or sale would be illegal. An expression of interest does not imply any form of commitment or duty. Anyone interested in participating in an \$Casio offering should read our disclosures and the offering statement that has been publicly released. This offering statement includes the final offering circular. The Securities and Exchange Commission (SEC) has not registered, licensed, or supervised \$Casio as a broker-dealer or investment adviser.

This Whitepaper does not constitute a prospectus, an offering memorandum, and/or other offering document relating to the Issuer and has not been reviewed or approved by any financial regulator or securities commission in any jurisdiction. Investing in Tokens involves several risks. There can be no assurance that Token holders will be able to receive a payback of their capital or any positive returns on their purchase of tokens. Before investing in Tokens, prospective purchasers should carefully consider the section "Risk Factors" of this Whitepaper, which despite not providing an exhaustive list or explanation of all the risks purchasers may face when investing in Tokens, shall be used as guidance. Prospective purchasers should consider carefully whether a purchase of Tokens is suitable for them considering the information herein and their personal legal and financial circumstances. Unless otherwise indicated or the context otherwise

requires, all references in this Whitepaper to “Issuer”, “we”, “our”, “ours”, “us” or similar terms refer to the Issuer.

INTRODUCTION

The crypto world needs a transformation where users can work with any blockchain seamlessly-more than it needs a dominant network. Our team believes that when blockchains power financial networks and all money becomes digital, entrepreneurs everywhere will be able to create new services and overhaul existing financial infrastructure. The maturity of blockchain technology now presents willing participants with much more functional nuance than ever before. The promise of this growing functionality has lured many into this nascent industry with promises of financial freedom and inclusion.

No doubt that a decentralized financial system can benefit a large portion of the population that is currently suffering from financial discrimination, high fees, and facing difficulties in managing their funds.

The Metaverse is the technological future. It is the future of Gaming, as well as the future of Gambling. It is the future of the Internet; the blurring of multiple realities; the fusing of the digital with the virtual and the physical world. Consequently, it will be omnipresent. Not only that, the Metaverse is a mighty fine place to have a Gambling CasinoXMetaverse. So, shuffle up and deal.

However, not everyone is as open to the endless possibilities of a decentralized Metaverse as we are as CasinoXMetaverse. There is a shift in the mindset of poker players and gamblers, a move from the traditional online casinos - where you can only use FIAT - to the blockchain-based Crypto Casinos where tokens rule.

The first Bitcoin casino appeared as far back as 2013. Pioneers of the Crypto Casino movement, Stake.com and Roobet.com, have taken on the mantle, enticing huge numbers of players and catching up with some of the largest, well-known online casinos. The trend is one of continued adoption and we expect the shift to be complete within the decade. CasinoXMetaverse will play a big role in the future of crypto casinos.

CasinoXMetaverse is a play-to-earn metaverse casino powered by the \$Casio token. CasinoXMetaverse game is a casino ecosystem that is owned, governed, and maintained by its players.

In gambling, it is no secret that the house always wins. The founders of the project believe that, in contrast, the treasury should belong to the players. This led the team to create a metaverse casino, powered by BEP-20 token \$Casio. Launching on Binance smart chain, the project provides users with fast and inexpensive transactions on the BEP-20 network. Finally, CasinoXMetaverse

Games allows its users to earn rewards for playing games, providing liquidity, and participating in governance.

NFTs

Blockchain technology in gaming is driven by non-fungible tokens (NFTs), digital assets that represent in-game content. These tokens are unique, rare, and indivisible, while the blockchain networks that underpin NFTs facilitate player ownership, provable scarcity, interoperability, and immutability.

CasinoXMetaverse offers a Play-to-earn game with a combination of multiple genres, built on BEP-20 BSC Smart Chain. The game aims to at entertaining players with simple but skill required to win levels which gets rewarded with \$Casio tokens. We aim being a part of this massive NFT & Gaming revolution taking place in the crypto industry by using our expertise in the field. We believe in grabbing the opportunity presented by upcoming markets by giving an opportunity to the common man for earning by playing games online.

Some of NFT games reward players with cryptocurrency, while others allow players to collect in-game NFTs that can then be sold for potential profit. Our CasinoXMetaverse will offer one of those NFT games which provide players with tokens through skilled gameplay. All digital assets and data will be open sourced, giving easy access to all enthusiastic to contribute building CasinoXMetaverse with us while gaining

NFT
Non fungible token

a more unique and personal experience. \$Casio is easy to play and earn tokens.

METaverse AND GAMBLING MARKET

The Metaverse is a hypothesized digital shared space in which everyone on Earth can seamlessly interact and engage in a fully immersive, simulated experience. Often conceived as a successor to Virtual Reality (VR), the term "Metaverse" was initially coined in Neal Stephenson's 1992 science fiction novel, *Snow Crash*, in which humans interact with each other (as well as software agents) via avatars rendered in three-

dimensional virtual space. Other works, such as *Ready Player One* and *The Matrix*, have attracted further awareness of the general concept of a simulated environment built on top of the physical world.

The current size of the market is almost 59 billion U.S. dollars, meaning the size is forecast to double in the upcoming years. Online gambling consists of playing casino-style games, poker, and/or sports betting via the internet. Due to factors

such as the advancement of technology available (VR/Distributed Ledger), higher trust of gamblers paying online, and the increasing digitization of everything, the online gambling market is seeing growth in many regions.

After sports betting was legalized by the Supreme Court in the U.S., online gambling companies are now able to grow their sport betting sectors legally and in compliance with financial regulators, thereby further supporting the market's growth.

Popular online casinos like Las Atlantis and Wild Casino have already been allowing players to make deposits and withdrawals using cryptocurrency. And

frankly, it's the future of online gambling.

The security that the decentralized crypto world provides is unrivaled among other banking methods, and with a growing community of users, it will only become more viable. Companies are already taking the idea of the Metaverse and pairing it with cryptocurrency gambling.

The Metaverse will do for online casinos what the Internet did for brick-and-mortar casinos in the 1990s. It will take the gameplay experience people love and make it accessible from anywhere with an Internet connection.

WEB 3.0

Web3 developers never create and deploy web applications that operate on a single server or store data in a single database (usually hosted on and managed by

a single cloud provider). Instead, web3 apps are built on blockchains, decentralized networks of numerous peer-to-peer nodes (servers), or a hybrid of the two. These programs are known as dApps (decentralized apps), and you'll hear that word a lot in the web3 community.

Network participants (developers) are rewarded and compete to deliver the greatest quality services to everyone utilizing the service to establish a stable and secure decentralized network. When it comes to web3, you'll find that cryptocurrency is often mentioned. This is because many of these protocols rely heavily on cryptocurrencies. It offers a monetary incentive (tokens) to anybody who wishes to help create, control, contribute to, or improve one of the projects itself.

These protocols may provide a range of services, such as computation, storage, bandwidth, identification, hosting, and other online services that were formerly supplied by cloud providers. CasinoXMetaverse looks forward to using Web3

technology to transact online. This secure web3 technology system will ensure that no information is leaked from the network. It will also make sure that every transaction on Canna Sugar is completed securely, safely, and fast.

Vision

The Open Metaverse is the next evolution of the internet, and play-to-earn ecosystems will play a crucial role in onboarding billions of people. Our vision is to be an early gateway by empowering anyone to join our community and earn while playing familiar games starting with virtual casino.

The \$Casio economic architecture is the Genesis of a new chapter in online casinos market, focused on creating EV-positive economic opportunities for our players while onboarding 7 billion digital souls into The Open Metaverse.

WHY BLOCKCHAIN?

A blockchain is essentially a sophisticated ledger of transactions that is duplicated and appropriated across the entire network of PC frameworks. Each square in the chain contains different transactions, and each time a new transaction occurs on the blockchain, a record of it is recorded to each member's ledger. Distributed Ledger Technology (DLT) refers to a decentralized information base that is managed by a group of people.

Blockchain has an almost infinite number of applications in practically every industry. The ledger technology may be used to track financial misappropriation, safely divide patient health records among medical professionals, and even serve as a better way to track protected innovation in business and music rights for artists.

Cryptocurrencies, like Bitcoin and Ethereum, are digital currencies (or tokens) that may be used to buy services and goods. Crypto, which functions similarly to a digital form of money, may be used to buy everything from lunch to your next home. Unlike fiat currency, crypto uses blockchain to operate as both a public ledger and a stronger cryptographic security system, ensuring that online transactions are always recorded.

The demand for online payments has increased as the digital economy has grown. All things considered; cryptocurrencies have become a more widespread solution for meeting the needs of online transactions. Cryptographic money refers to digital monetary units that operate independently of any bank and can be used across borders without requiring permission. Its transaction data, which is often maintained on a general ledger, is accessible to the public and viewable by system members (also known as nodes within the network).

Furthermore, authorities such as banks, tax authorities, and legal systems are largely uninterested in digital currencies. Digital exchange platforms are platforms developed on blockchain and deal with no licensing authorities. As a result, trading platforms sometimes take advantage of users' trust and faith for their gain. Due to the profitable nature of this behavior, there has been a spike in the establishment of illegitimate trading platforms. Decentralization, on the other hand, is a safeguard against such platforms. Without the use of intermediaries, exchanges should be made directly between interested individuals that wish to swap their currencies, referred to as peer-to-peer exchanges.

The market is enthused by blockchain technology and the decentralization of currency that blockchain technology and cryptocurrency provide. It is estimated that well over 4000 different cryptocurrencies currently exist, and each has a new use case for blockchain being created on a near-weekly basis.

CORE VALUES

The core values of CasinoXMetaverse are:

TRANSPARENCY

We want to make this project successful and bring an actual change. To achieve this, we have brought a transparent plan. The core value of CasinoXMetaverse is transparency to the community. Being transparent with the community means we trust them enough to reveal certain bits of information, without offering too much information. The purpose of CasinoXMetaverse is to offer play to earn games for casino lovers in the metaverse in a community-based environment and involve a

diverse group of NFTs holders and businesses all over the world focusing on the future gambling, casinos, metaverse, and non-fungible tokens. \$Casio token is aimed at providing value to the community. Transparency primarily involves two areas: proof of solvency and proof of legitimate trading volumes. Proof of solvency is critical because community and investors need to know the risk of engaging with a financial entity that holds their funds.

COLLABORATION

There will be a constant collaboration with the investors, Casinos, gamers, and NFT businesses and marketplaces. Throughout history, communities have played an intrinsic part in how humans come together to share ideas, collaborate and align themselves with each other to incorporate a common identity. Since the dawn of time, it has been embedded in our DNA to naturally form tribes, factions, or groups to work together and produce better results than if we were to operate alone. \$Casio allows the participation of the Community, should be fair and transparent.

Collaboration is a key business enabler and parties decide to collaborate if:

- ✓ ☐ There is a business objective that cannot be achieved individually.
- ✓ ☐ There is value for all parties in reaching the objective.
- ✓ ☐ Communities acknowledge that the resulting value must be shared.

TRUST

Trust has pivotal importance in the gambling, casino, NFT, and blockchain market; it is the main building block of every business environment. It is essential to build up trust before digging into any contract. The NFT and crypto ecosystem require clarity not only in the community but also in the development and

security of the users. Hence, we work to gain the trustworthiness of our users to grow and expand rapidly.

\$CASIO TOKEN

The native digital cryptographically-secured utility token of the CasinoXMetaverse ecosystem. \$Casio is a transferable representation of attributed functions specified in the protocol/code of the CasinoXMetaverse ecosystem, which is designed to play a major role in the functioning of the ecosystem on the CasinoXMetaverse ecosystem and intended to be used solely as the primary utility token on the network.

\$Casio is a non-refundable functional utility token which will be used as the medium of exchange between participants on the CasinoXMetaverse ecosystem. The goal of introducing \$Casio is to provide a convenient and secure mode of payment and settlement between participants who interact within the ecosystem on the CasinoXMetaverse ecosystem, and it is not, and not intended to be, a medium of exchange accepted by the public (or a section of the public) as payment for goods or services or for the discharge of a debt; nor is it designed or intended to be used by any person as payment for any goods or services whatsoever that are not exclusively provided by the issuer. \$Casio does not in any way represent any shareholding, participation, right, title, or interest in the Company, the Distributor, their respective affiliates, or any other company, enterprise or undertaking, nor will \$Casio entitle token holders to any promise of fees, dividends, revenue, profits or investment returns, and are not intended to constitute securities in Singapore or any relevant jurisdiction. \$Casio may only be utilized on the CasinoXMetaverse ecosystem, and ownership of \$Casio carries no

rights, express or implied, other than the right to use \$Casio as a means to enable usage of and interaction within the CasinoXMetaverse ecosystem.

\$Casio would also provide the economic incentives which will be consumed to encourage users to contribute and maintain the ecosystem on the CasinoXMetaverse ecosystem, thereby creating a win-win system where every participant is fairly compensated for its efforts. \$Casio is an integral and indispensable part of the CasinoXMetaverse ecosystem, because without \$Casio, there would be no incentive for users to expend resources to participate in activities or provide services for the benefit of the entire ecosystem on the CasinoXMetaverse network.

KEY FEATURES

Some key features of \$Casio tokens are:

- ✓ **Secured and safe:** \$Casio token leverages a distributed peer-to-peer consensus network that cryptographically helps in securing every transaction.
- ✓ **Quick transfer:** Instant fund transfer globally is available with the help of fast block execution unlike traditional remittance, unmatched speed, and payment processors.
- ✓ **Decentralized:** Direct transactions among network participants without the presence of a central facilitator are enabled with the help of decentralized technology.
- ✓ **Easy to use:** User-friendly interface intended for seamless Real-world use cases.
- ✓ **Scalability:** Assures scalability for pacing up with the industry's transaction requirements, thereby facilitating mass adoption of cryptocurrency.

RISKS

\$Casio provides a lot of benefits to casino lovers and gamblers, but on the other hand, it is not out of risk. At \$Casio, our team believes that we should be transparent and declare the potential risks involved in \$Casio.

Like any other crypto coin out there in the market, \$Casio is volatile. The market value of \$Casio solely depends upon the number of people who buy it or sell it. As of now, \$Casio cannot be mined or earned any other way than bought, it has to see a lot of improvement in the coming days.

The market value of \$Casio may vary at the start, but we can guarantee that it will become more stable over time. We don't want it to be unstable. We don't want it to be the next USDT either, with no purpose.

REGULARITY RISKS

The blockchain industry is in the initial stage of its regulation. Governments of countries are in the process of studying blockchain technology, and some countries impose restrictions (for example, the United States, China, South Korea). No legal documents are regulating the crypto industry yet - the laws can appear later and can significantly affect the activities of blockchain projects, including our project. We warn you that such laws can significantly limit and even stop the project activity, we are not responsible for the negative consequences associated with the possible regulation of the industry in the future.

TOKENOMICS

Distribution of Tokens will take place after private sale and public sale. You will be able to withdraw the purchased \$Casio Tokens on an BEP-20 compatible Binance wallet in the account settings.

TOKEN DISTRIBUTION

ROADMAP

PHASE 1

- Social Media Launch (Telegram, Twitter, Reddit, Instagram)
- Token Creation
- Token Audit
- Website Launch
- White Paper design and writing
- 20, 000 Telegram members and Twitter Followers
- Airdrop campaigns
- Apply for listing on CoinSniper and CoinHunt

PHASE 2

- Launch Public presale
- Launch on Pancakeswap
- Apply for listing on CoinGecko
- Apply for listing on CoinMarketCap
- Marketing push to spread awareness
- 50, 000 Telegram members
- 50, 000 Twitter followers
- 10, 000 \$CASIO holders

- Lottery once week multiple winners

PHASE 3

- Casio phone wallet app (Android, iOS)
- Casio NFT Collection Creation
- Casio NFT game Launch
- In Game NFT market place development
- Marketing push to spread awareness
- 100, 000 Telegram members
- 100, 000 Twitter followers

PHASE 4

- Integrate social with Casio game to walk and socialize while playing games.
- Create a house where players can customize with NFT
- Create a city where players can drive to different destinations to play Casio and socialize
- Massive open world metaverse where all Casio from all different parts of the world will be playable

Rounds

Casino creation right in the telegram app by using a bot. CasinoXMetaverse is an alternate solution to the traditional gambling platform, allowing you to reach a whole new audience.

PRIVATE SALE

Private sale happens for our core investors. They just need amount of BNB to our private sale wallet and once sale complete our team will airdrop \$Casio to all investors.

PUBLIC SALE

We will do the public sale via pinksale.finance. Join our community and make the journey to the moon.

LISTING ON PANCAKESWAP

Once public sale complete, we will lock \$Casio on Pancakeswap.

BENEFITS OF CASINOXMETaverse

CasinoXMetaverse offers following benefits to its users:

NEW FORMAT

Unique and new. Casino platform allows admin to control every aspect-components, structure, content, and bonuses of the CasinoXMetaverse.

ALL INCLUSIVE

More than 3,000 games from the leading game providers all over the world, a chatbot, an admin platform, bonus programs and much, much more.

HIGH SPEED

The CasinoXMetaverse is fastly-paced allowing users to play many games in a shorter period of time.

BONUS STRATEGIES

Implement all the bonus strategies available in online casinos, allowing you to retain and obtain new players.

VARIETIES OF PAYMENTS

Support for bank transfers, electronic wallets, international online systems, and transfers in cryptocurrency.

SEAMLESS SYNC

Full synchronization of your online casino on the web and CasinoXMetaverse, making player authorization extremely easy.

PROJECT SECURITY

Casino X Metaverse values our security and confidence we want to instill in our community. That's why we have completed various measures to prove our integrity and dedication to the longevity and security of Casino X Metaverse.

The Casino X Metaverse team will lock liquidity for an extensive period and will continue to extend locks to showcase our desire for longevity.

The Casino X Metaverse team were quick to establish the contract renouncing to relay our integrity and determination to prove our intent.

We are pleased to say that we will have our token audited by TechRate and the report will be visible online.

HOW TO BUY \$CASIO ON PANCAKESWAP?

STEP 1

BEP20 token is live on Binance Smart Chain. MetaMask is a third party BEP20 browser wallet, and the very best at that! On Google Chrome, visit metamask.io to download the extension and set up a wallet. On mobile? Get MetaMask's app for iPhone or Android.

STEP 2

Use Coinbase / Binance to purchase BNB and send it over to your MetaMask Wallet Address. Or if you already have BNB, simply send it to your MetaMask Wallet.

STEP 3

Visit this link to buy \$CASIO.

<https://pancakeswap.finance/swap?outputCurrency=0x82A336bA310b5a590a59dBo8AoE1FF8C33Df8Bbd>

STEP 4

Fill the amount of BNB in the Pancakeswap and confirm the transaction.
