

This is Our

Fat Cat Killer Mission Statement

\$KILLER is a disruptor of the status quo.
Step out of the matrix, re-wire the system, erase income inequality.
When the 99% become the 1%, we've succeeded.

fat cat killer

Fat Cat Killer, is a new cryptocurrency, designed for investors searching for a safe financial instrument to enter the blockchain-driven world of Decentralized Finance (DeFi) – and one that, from top to bottom, employs the industry’s best practices to generate the highest returns.

Founders and experts spent over a decade in the marketplace, creating, trading, living and breathing crypto. Now, these Subject Matter Experts, in the fields of finance, marketing, software development and cyber security have come together to form a Dream Team. With a memorable name, entertaining backstory, real-world utility software, a charitable mission, and an achievable roadmap to supercharge its growth, Fat Cat Killer is primed to become the hottest and most trending coin of 2022. The Cat is coming for the leading doggies!

We have developed a plan to drive \$KILLER to the top.

TRANSPARENCY

THE DEAL

As founders, we treat ourselves no different than our team and advisors. This means we have the same lockup provisions, the same burn rates, the same everything. In our commitment to transparency, we have locked this into our smart contracts.

THE LOCK

The lock is critical for the stability of every new coin in order to preserve its value. By locking founders, advisors, and the team we show our commitment in maintaining a steady rise in value and a hedge against volatility.

THE BURN

We launch with an initial 900 trillion-coin supply and will execute an unprecedented, rapid burn to reduce total volume to 9 trillion coins. Our 99% burn is the highest of any coin in history, engineered to rapidly increase coin valuation.

\$KILLER is an extremely deflationary coin. We have designed our burn system that will reduce the total supply as quickly as possible. Seven percent (7%) of coins sold in every transaction will be burned. This burning begins at launch and continues until we reach our target total supply of 9 trillion coins. This feature is embedded into our smart contracts, and will not be changed.

900 TRILLION COINS

9 TRILLION COINS

LAUNCH

Our launch date is within 30 days after contract deployment and contingent on third party smart contract audits.

Ticker symbol is KILLER.

Smart contract address will be available on our website <http://www.fatcatkiller.com>

HOW TO BUY

1. DOWNLOAD YOUR WALLET

Download any BEP-20 compatible wallet as a web browser extension or mobile app.

2. SET UP YOUR WALLET

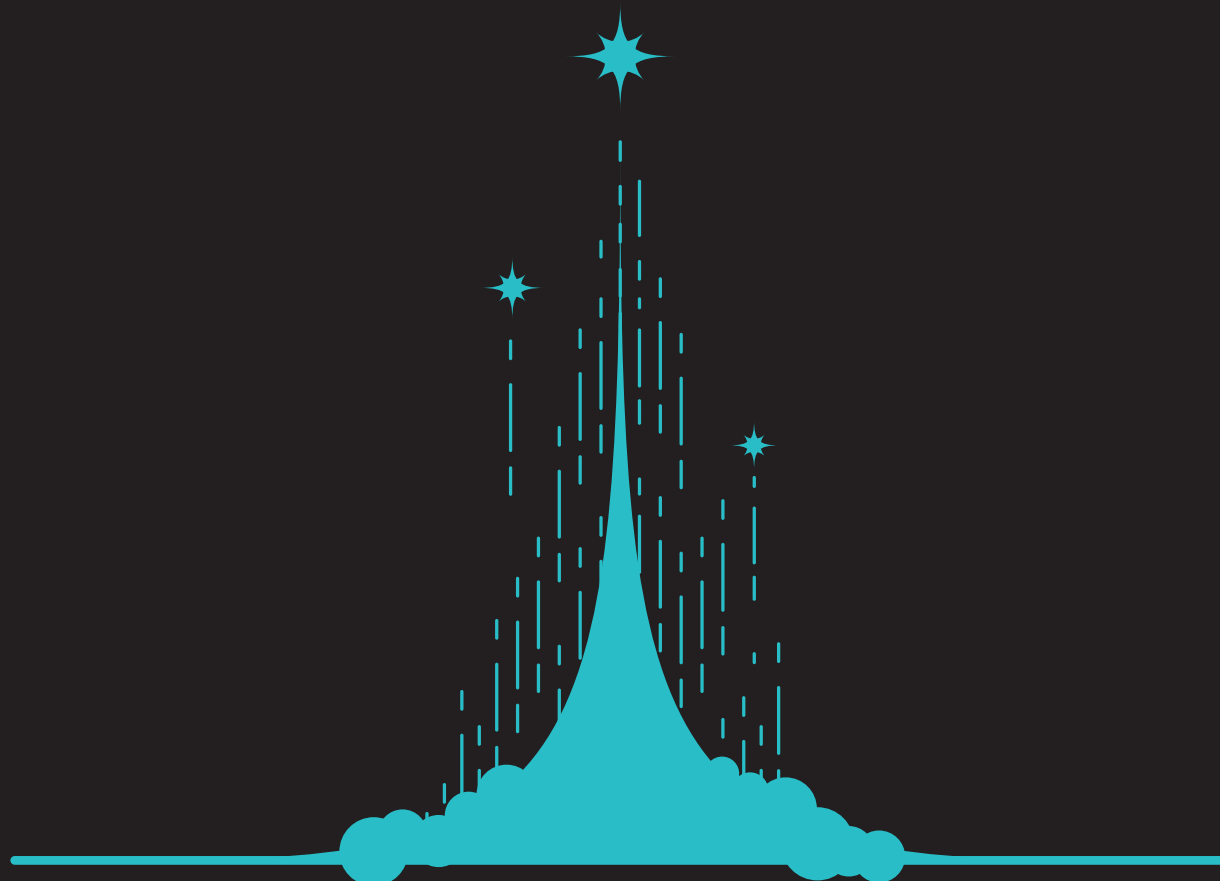

Set up your account, adding the Binance Smart Chain, BEP-20, to your network list.

3. BUY \$BNB

Use your favorite exchange to buy and send \$BNB and to your wallet address.

4. EXCHANGE \$BNB FOR \$KILLER

Go to the PancakeSwap Exchange and connect your wallet. Then, at the exchange page, input \$KILLER, add your contract address, set slippage to 20%, and swap your \$BNB for \$KILLER

SECURITY

PARTNERSHIPS

We strive to make \$KILLER a safe investment for all holders. One of the most pressing issues in the cyberworld is security, so we are developing the most secure wallet on the market.

We've partnered with StrikeForce Technologies to utilize its patented Mobile Keystroke Encryption technology and its ProtectID Out-of-Band Multi-Factor Authentication platform to keep sticky fingers out of your wallet. ProtectID was awarded "Five Stars" from SC Magazine and is the perfect platform for helping companies achieve a zero-trust environment. While Out-of-Band (OOBA) authentication was originally used by financial institutions and other organizations that required high security requirements to prevent unauthorized access, it has now become the de-facto standard for protecting network access and transaction verification.

For over 20 years, StrikeForce Technologies, a leading cybersecurity software development firm, has been developing, maintaining, and deploying cutting-edge cybersecurity solutions to Consumers, Small to-Mid-Size Businesses (SMBs) and Corporate Enterprises.

OPEN SOURCE

\$KILLER will utilize open source technology to the fullest extent to provide maximum visibility into the project for the community.

CERTIFICATIONS

Three separate security audits like Soken, TechRate, Solidity Finance, or others will be available on our website coinciding with legal opinions on our tokenomics and whitepaper.

CHARITY

Our experiment is simple, we're testing the hypothesis that crypto can give opportunity to those afflicted by income inequality. To do this, we've partnered with Global Empowerment Mission (G.E.M.) (globalempowermentmission.org), a 501(c)(3) non-profit organization founded in 2011 that has supported 295 missions in 28 countries, all 50 US states, and territories including the Caribbean.

We chose G.E.M. as a third party administrator and auditor of our donation fund for many reasons, one of which is they have Guidestar's (guidestar.org) Platinum Seal of Transparency; we believe is important so that crypto investors can feel confident their donations are held accountable to fulfil their charitable mission(s).

One of our first incubators is in Honduras, in which G.E.M. will work with Humanity and Hope United (humanityandhope.org) to build sustainable homes, provide grand farm irrigation, and new job creation in the unserved remote villages of the country.

Our second incubator is in the island of Puerto Rico, as the 1% own 99% of the island's assets, as is the case with the majority of the global economy. Conversations with our Puerto Rican (PR) contacts are in progress, and Fat Cat Killer, through G.E.M., will choose our charitable institution(s) within the coming weeks. G.E.M. has a strong presence in PR through its robust mission in delivering food, aid, shelter, clean water, and the subsequent rebuilding efforts in the aftermath of Hurricane Maria.

Fat Cat Killers desire to close the gap in income inequality is achieved by creating opportunities for disadvantaged individuals and their respective communities across the globe. With our partners we will help fund the creation of economic opportunity zones, sustainable villages, disaster response, single mothers, youth programs, and providing the tools and education to empower and elevate those less fortunate onto a more level playing field.

MARKETING

Fat Cat Killer has worldwide multi-platform marketing campaign that utilizes its partnerships with the best mainstream and crypto marketing firms. Additionally top influencers, in all platforms will provide the organic reach for viral impressions.

\$KILLERs catchy and creative brand lends itself for seamless integration into the NFT space. Fat Cat Killer is destined for heavy involvement in the NFT sphere using its own in-house production as well as our partnership with the Startup, "Duh!Art".

As part of our marketing strategy we will select the best of the NFT's produced by our Fat Cat Killer community and reward its most creative artists. Our partnership with Duh!Art will allow us to utilize the best platform to share our members' creativity with the world. ALL proceeds received from Duh!Art will be given to the artist(s) responsible for its creation.

Stay tuned for Killer NFT events to be announced on our website and telegram channels.

UTILITY

Killer Wallet

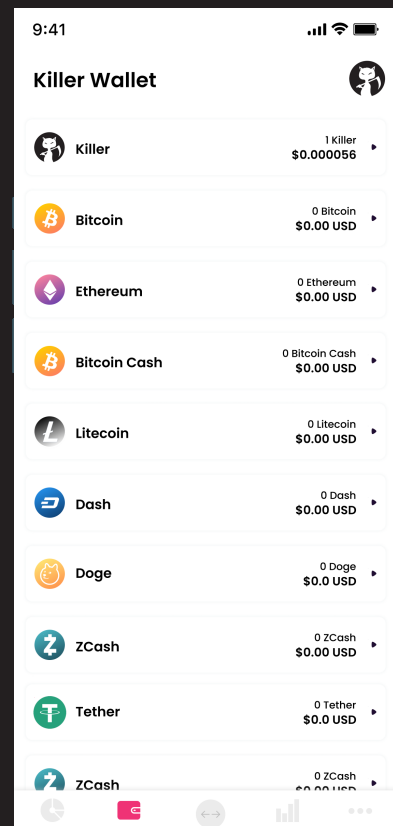

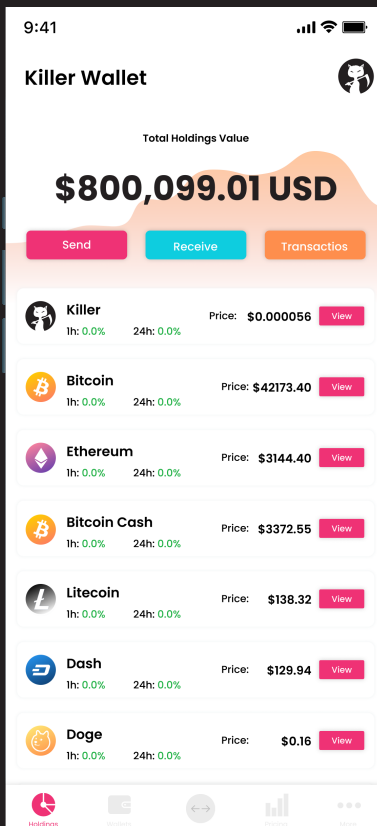

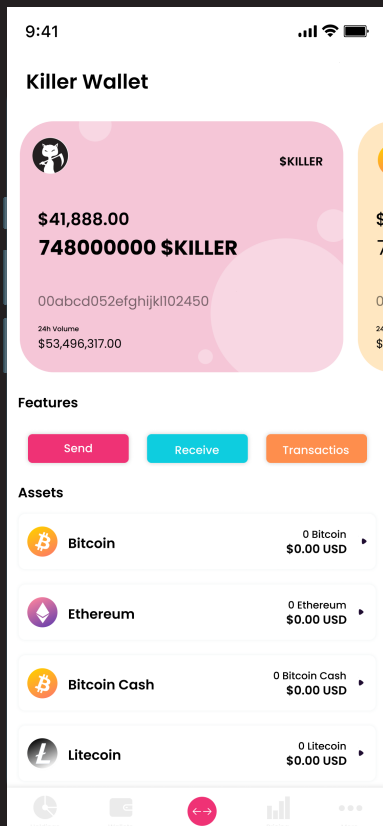

Killer Wallet is user-friendly, with an easy-to-understand interface, that's free to download, and it accepts most coins. Each transaction is subjected to the highest security standards in the industry. Embedded cybersecurity elements like encryption and authentication make it one of the most secure wallets on the market. While integration with Killer Pay will produce a completely new mode of payment.

Killer Pay

Killer Pay is innovative software that handles \$KILLER payments between businesses, processing companies and private coin wallets. It's in development to allow widely available crypto payments with a special focus on service industry and luxury brands.

Multiple worldwide locations have committed to accepting \$KILLER using Killer Pay.

To see current partners, see the interactive map on our website.

\$KILLER ROADMAP

The origin of the concept. Begin the ideation around the payment method using crypto.

FEBRUARY 2021

Business concept development.

MARCH 2021

Engaging potential partners and team members.

APRIL 2021

Idea of \$KILLER to have its own medium for transactions.

MAY 2021

Market research for building the best features into the payment system and coin itself. Identifying Target audience.

JUNE 2021

Attraction of first investors.

AUGUST 2021

Begin the tokenomics and whitepaper.

SEPTEMBER 2021

Initiate Smart contracts, website and software development.

OCTOBER 2021

Engagement with consultants and advisors.

NOVEMBER 2021

Engaging with potential international charities.

DECEMBER 2021

Contractually finalizing our partnerships.

JANUARY 2022

Smart contract audit and legal opinion. Pre-Launch phase and marketing awareness.

MARCH 2022

Launch phase and marketing engagement.

APRIL 2022

Official Launch with heavy investment into marketing & engagement with influencers.

MAY 2022

Finalizing Exchange applications.

JUNE 2022

SEC Filing.

AUGUST 2022

Begin Killer Wallet Testing and Killer Payment System Integration.

OCTOBER 2022

Launch of our Killer Wallet.

JANUARY 2023

Soft launch of our global payment system with compliant retail partners.

MARCH 2023

Start exclusive offers and cashback ("Coinback") program for users of the Killer Pay system.

JULY 2023

Begin Creation of Killer Exchange (Exclusive and Specialized)

OCTOBER 2023

*The above timeline may vary depending on the licensing and regulations of countries around the world.

CONCLUSION

The goal of Fat Cat Killer is to give its investors the opportunity to enter at the ground level of an innovative payment system while simultaneously closing the gap in income inequalities, by providing opportunities, through our partnered charities.

In order to succeed, you need a plan – and we have a good one that incorporates an unprecedented burn system, along with full transparency to investors, a secure wallet and payment system, real-world utility, a charitable mission, and memorable branding for accelerated growth.

Our methodology is straightforward: 99% is the largest burn in crypto history. We're burning 7% on every transaction. From 900 trillion coins to 9 trillion: this is how we lose those zeros after the decimal on our exchange rate... by burning them... literally.

In full transparency, Fat Cat Killer demonstrates commitment to its investors by exposing its entire business model and ownership structure to the public.

Fat Cat Killer has made cybersecurity a focal point because protecting your investment is the same as protecting our own. We partnered with StrikeForce Technologies to utilize its patented Mobile Keystroke Encryption & Authentication to keep our investments safe and dirty paws out of your wallet.

We secured agreements with more than 50 retail outlets around the world. From east to west, north to south, we're testing our innovative payment technology between businesses, processing companies and private coin wallets.

That's called utility, and since seeing is believing, our agreements are available for viewing on our website.

The Killer's backstory and memorable name are fun, ripe for accelerated growth and investor adoption. Fat Cat Killer is a disruptor, and to disrupt, you need to spread fast. With our social marketing blitz and grassroots community involvement, the top dogs should make space on the leaderboard for the new "Cat" in town.

We have it all; a method to consistently add value, along with transparency, security, and utility. We've created a no-nonsense, fortified approach to making \$KILLER a disruptor and a creative brand to ensure we make a huge splash, or should we say "slash," in the dog dominated crypto-market.

FAT CAT KILLER'S ORIGIN STORY

A cat and his two brothers are born in Harlem, New York, during a deep winter freeze. This season has been exceptionally cold, but not like today. Because the cat is the smallest of the three kittens, his mother implores his siblings to keep the infant cat warm, using their own bodies. They desperately try to feed the infant what they scavenge, but he isn't able to eat or thrive. On the verge of starvation and freezing to death, the family tucks the kitten away in a small hollow tree trunk while they stand guard at the sealed entrance.

That night, the kitten awakens hearing coyotes outside his hideout, and a fierce battle ensues. The kitten tries to claw its way out to defend his family, but his paws are too small to cut through the protective barricade in time. His family bravely fights off the attack, but at the cost of their own lives and a single dead coyote. After many hours of pawing the snow, the kitten finally emerges to the scene of carnage, and he falls into overwhelming grief.

The kitten, now on the verge of death - too weak to move, starved, and immersed in anger - begins eating from the corpse of the dead coyote. What he doesn't know, is that this was no ordinary canine, it is the corporal shell that contained the spirit of a fierce and ancient warrior, Hototo. As he eats, the spirit leaves the coyote, and enters he own body, connecting with the warrior god's spirit. Hototo teaches the kitten to hunt using the ancient and familiar scythe.

Soon the kitten has tracked and killed the coyote pack that took away his family. Following Hototo's traditions, the cat feeds on the corpses of those he's killed as a sign of respect for the defeated, becoming fatter and stronger with each slaying.

Determined that no children should be without their parents, the kitten continues to hunt coyotes. As the bones of the coyotes increased, so did the cat's reputation. Seeing the bones of the coyotes, the dogs in the area become frightened for their own lives and refer to him as "Fat Cat Killer". Fat Cat Killer, or F.C.K. for short, returns to his original shelter, avenged, but still lonely, sad, and without purpose. Exhausted, he falls asleep to awaken a week later when he hears a mouse crawl into the hollow, also seeking shelter. The cat quickly snatches up the mouse, ready for his first meal in many days.

Thinking fast, the clever mouse says, "Why will you kill me? I am not your enemy. Your enemy, those who left you alone without a family, are the coyotes. Your enemy is out there, not here. If we work together, you can keep me warm, and I will bring you joy, which eludes you, and a friend, as you are lonely. The kitten listens and allows the mouse to live. Then, the mouse reveals its true identity, that of Hotei, a God of Happiness, prosperity, and good luck. "I could have left you poor and lonely," said the mouse, "but I presented you with a test to see if you were worth teaching." Hotei's reputation is a of a year-round Santa Claus, traveling around the city with his sack, giving food and necessities to the poor and needy and doling out presents to those who deserve them.

With the spirit of Hototo and the teachings of Hotei combined, F.C.K. only hunts the bully k-9's that prey upon the weak. He slays them, eats them, grows stronger, and now, takes their riches too. F.C.K. wears the bejeweled collars of the bully dogs he slays as a trophy. On other kills, he scalps the collar diamonds to adorn his scythe, as a warning. The k-9 clans killed families and took their fortunes for centuries. Remembering his teachings, the Fat Cat Killer gives the wealth from those he defeats to the members of his community...the same animals who have been left out of prosperity for generations.

If you want to find Fat Cat Killer and his Community, you will no longer find them in the streets of Harlem, but under the canopy of trees of Central Park. Both feared and loved, the scythe is both a symbol of warning, and one of hope.
