LITEPAPER

# INTRODUCING INPULSEX

The stats of CoinMarketCap depicts the total sales value of all cryptocurrencies, which peaked at about \$3 trillion as of November 2021. This expressive value makes us comprehend how crypto assets are being adopted worldwide. The concept of decentralization has seized the attention of a wide range of audiences, from big shots to college teens.

History has shown us repeatedly the appearance of forward-thinking individuals, people that introduced new concepts and technologies that advanced and changed life on the planet in many ways. Examples are Thomas Edison, Galileo Galilei, Nikola Tesla and Albert Einstein, to name just a few.

Humankind's curiosity about life outside Earth is not a secret, considering the countless portrayals on the big screen now seem possible to be explored with the work of a single individual. Elon Musk's ambitious plan of making humans a multi-planetary species could suggest he is either one of history's greats or maybe not from this world.

The aspiring vision of this game-changer individual made us come up with a groundbreaking project to offer unshakeable support to his dream.

InpulseX is a cryptocurrency project created to support the biggest mission of humankind, which is to become a multi-planetary species. As great supporters of blockchain and digital currency, we shall leverage this emerging technology to add additional support to the dream of colonizing Mars into reality. Wonder how?

\$IPX is the key!

\$IPX is the native token of the platform. \$IPX holders will have a series of benefits from investing, at the same time, supporting the most extraordinary mission ever conceived. It is a full-fledged, modern-day crypto token that aids the audience worldwide to have access and receive the full benefits of decentralization. It will create awareness of this interplanetary journey's optimistic vision and support it by raising funds through our \$IPX tokens. A generous 28% of \$IPX total supply will be allocated to the ambitious Red planet mission led by Elon Musk via SpaceX.

The \$IPX community will benefit from rewards paid in a stable coin, unique NFT's collectables airdrops, and an out-of-this-world play-to-earn game experience. On top of all those fantastic benefits, \$IPX supporters will be part of history by directly participating in the most extraordinary mission of humankind.

# THE BEGINNING

Elon Musk is helping humanity evolve, expand the knowledge and create new out-of-this-world technologies.

Since his arrival on the blue planet, Musk has developed and delivered countless projects that have improved our lives in many ways. However, he has now decided that it is time to explore and colonize other planets. He built a whole new interplanetary transport system to navigate humanity across the galaxy.

This epic journey is not without challenges, and we want to show our appreciation for all the benefits he has provided for humankind by supporting his dream and mission.

Let's unite and show some love as he embarks on his interplanetary journey towards Mars.

The aforementioned donation events will be triggered by a predetermined total market cap target over time.

Join the space revolution, support this ambitious cause and be part of history.

# \$IPX - THE NATIVE TOKEN

\$IPX is a new token built on the incredible PulseChain, focusing on energy efficiency, cheaper fees and faster transactions.

The token provides phenomenal privileges through the InpulseX utilities. \$IPX will be the prime instrument of payment and transactions to the ecosystem. It ensures constant growth and potential lucrative returns for the token holders. The various utilities offered are as follows.

## REWARDS

One of the most exciting benefits for \$IPX token holders is the rewards capability. Simply by holding \$IPX tokens, the community will receive rewards for every transaction that occurs in its blockchain. To avoid unnecessary exposure to the notorious crypto market volatility, \$IPX holders will accumulate rewards in a stable coin. These revenues stand as an excellent passive income solution for all token holders. The longer you HODL, the more you earn, simple.

## GOVERNANCE

\$IPX is a governance token created to allow token holders to help shape the future of the project. \$IPX holders can influence decisions by exercising their voting rights.

The voting rights are measured by the number of tokens you hold at the time of each proposal. The proposals will be a list of key decisions created by the team to be decided together with the community. The project believes in the strength of like-minded people working towards the same goal. Together we can make history!

## COLLECTABLE AND IN-GAME NFTS

NFTs are indeed taking the world by storm and are incredibly relevant to \$IPX ecosystem. We step into the NFT space by offering unique collections from top worldwide known artists.

From super rare collectables to in-game playable NFTs, the most loyal \$IPX holders will benefit from exclusive surprise airdrops.

A snapshot will be taken from time to time, and the top holders will automatically receive one NFT each. For each airdrop event, the 10 rarest NFTs will be allocated randomly. The rest of the collection will be available to purchase directly from the \$IPX website and other relevant platforms.

# PLAY-TO-EARN GAME

We are planning to develop our play-to-earn game during the phase 3 of our space map, where the players will take part in the Mars mission.

Beyond being extremely fun and enjoyable, the game offers the opportunity to generate an attractive income by simply playing it. \$IPX tokens is the currency utilized to participate and purchase the assets available in the game. Just by playing the game comfortably from your place and progressing through the missions, you can create an extra revenue stream and potentially unlock exclusive NFTs.

More details about the whole experience to be announced with the game release.

## MORE THAN JUST A DEX, AN EXPERIENCE

An interplanetary DEX built for the PulseChain network.

More details about the DEX will be shared during the phase 2 of our space map.

# TRANSACTION FEE OF \$IPX TOKEN

\$IPX tokens have a built-in fee that is initiated with all the transactions. The platform incurs a transaction charge of 10% when you buy, sell, or transfer the token. This percentage is split up in the following ways.

## REWARDS DISTRIBUTION

Our smart contract is designed to allocate 4% of every transaction and distribute as stable coin rewards to token holders, according to the amount of \$IPX held in their wallets.

## LIQUIDITY

The smart contract automatically provides 3% of every transaction to the liquidity pool. Liquidity pools are pools of tokens that are locked into a smart contract to facilitate efficient asset trading.

\$IPX LP tokens will be locked by a third-party smart contract company and renewed every year.

## GAME DEVELOPMENT

A 2% fee will be used for developing the play-to-earn game and its marketing campaigns.

## BUYBACK

The remaining 1% will be used as a buyback feature to be exercised in the future to improve the project further.

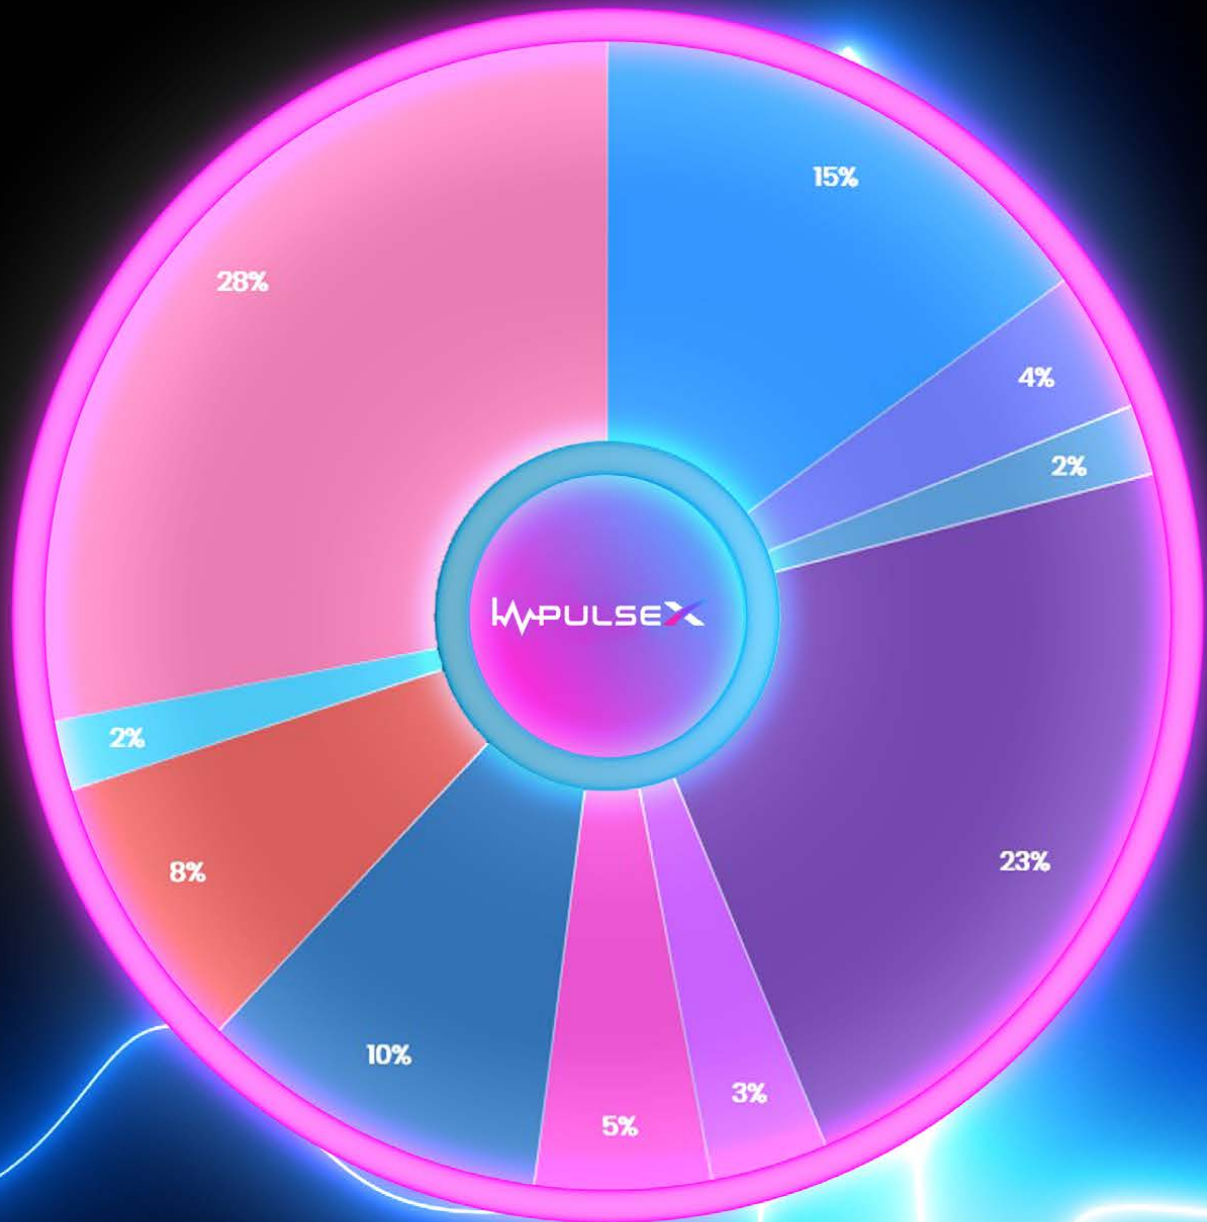

# TOKENOMICS

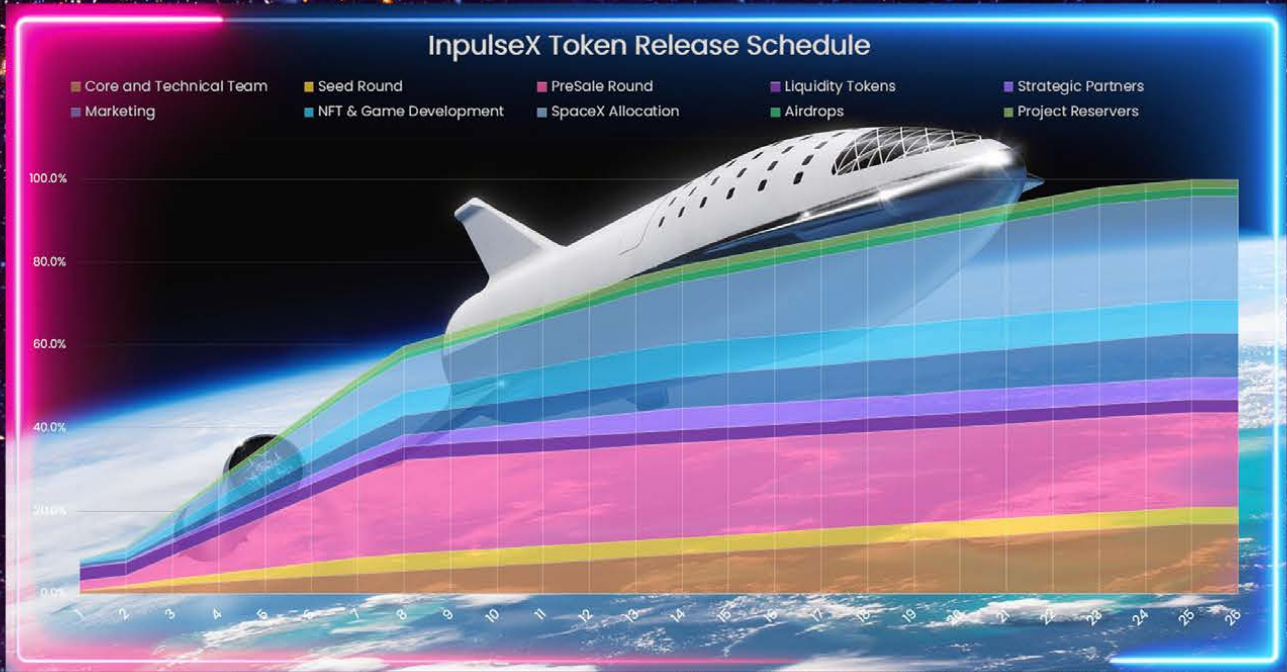

TOKEN NAME	INPULSEX
TOKEN SYMBOL	\$IPX
DECIMAL SUPPORT	18
TOTAL TOKEN SUPPLY	100,000,000,000,000 [ONE HUNDRED TRILLION TOKENS]
TOKEN PRICE PRESALE	\$0.000000027
CIRCULATING SUPPLY AT TGE	4.767%
PRESALE DATE	01 / FEB / 22
INITIAL MCAP	\$143,000
PANCAKESWAP LISTING DATE	02 / FEB / 22
PANCAKESWAP LISTING PRICE	\$0.00000003

# TOKEN DISTRIBUTION

Core and Technical Team	15%	Seed Round	4%
PreSale Round	23%	Liquidity Tokens	3%
Marketing	10%	Strategic Partners	5%
NFT & Game Development	8%	Airdrops	2%
Project Reservers	2%	SpaceX Allocation	28%

# TOKEN RELEASE SCHEDULE

# SPACE MAP

## PHASE 1

- Pancakeswap listing
- 1st Meme contest
- CEX listing
- 1st \$IPX token airdrop
- 2nd contract audit by CERTIK
- 1st NFT collection & airdrop
- 1st NFT exposition Los Angeles
- Marketing Campaign

## PHASE 3

- NFT Marketplace launch
- GAME development begins
- 2nd celebrity endorsement
- 3rd NFT collection & Airdrop
- 3rd NFT exposition
- Partnership with 1st game token
- Merchandise store
- DEX launch (Name TBA)
- Influencers Marketing Campaign

## PHASE 2

- 1st celebrity endorsement
- 2nd CEX listing
- Implementation of 2nd network
- 2nd NFT collection & airdrop
- 2nd NFT exposition London, UK
- Partnership announcement
- Expand Marketing Campaign
